The question of the most profitable fertilizer for potatoes has been the subject of very extended investigations.

The conclusion is that 1000 lbs. per acre of 5% ammonia, 8% phosphoric acid and 10% POTASH for early potatoes and 800 lbs. of 3-6-8 for the late crop are the most profitable under average conditions. The Potash should be in the form of Sulfate.

Many growers use double these amounts. Such brands can be had if you insist upon them. Do not accept so-called potato fertilizers of low grade. Write us for Potash prices and for Free books with formulas and directions.

Between now and January of the new year we are going to try to send a statement to every subscriber in arrears. Meantime it will save us lots of trouble and expense if you will pay what you owe without requiring a statement. Mr E D Epps of Central presented us Saturday with a sackful of sweet potatoes and turnips, which, it were needless to say, was a most acceptable gift. As Thanksgiving draws near we are daily more forcibly reminded of how many things we should be grateful for, especially the manifold kindnesses of our liberal-hearted friends. Mr Epps says that he will have some better turnips later on, but the kind he sent us is plenty good enough for us, thank you.

Within the past two weeks we have had two half-page advertisements and one whole page, all of which came from other counties, except one page. Friends, if it pays the business men of Florence and Georgetown to use our space, how much more profitable should it be to the business men of our own town and county, where the circulation of The Record is so much greater? Don't get demoralized by the supposed "dull season"; now, as never before, is the time to advertise.

Most weekly papers published on Thursday, the day The Record goes to press, require "copy" for communications of length, or advertising, to be submitted not later than Saturday or Monday. We have strained a point and extended our limit to Tuesday noon of the current week, yet nearly every week we receive advertisements on contributions Wednesday and even Thursday, accompanied always with the request "to be sure to publish in this week's paper."

We are sorry to have to make excuses again for the paper being late, but there came in a rush of belated matter after our time limit, all of which we were asked to be sure to publish this week, as it was very important. We endeavored to comply, but although we worked overtime, we could not get the type set and the paper printed on time. It is physically impossible to avoid being late unless we adhere strictly to our rule not to publish anything that comes in later than Tuesday morning. This week we had over two columns to come in Wednesday and Thursday. Now, friends, we are doing all in our power to give you a good service, won't you please help us by not asking us to publish lengthy articles submitted later than Tuesday morning? Unless our rule be adhered to, we shall be forced to change our day of publication to Friday, instead of Thursday.
