HOW WINTHROP GIRLS SPENT THANKSGIVING.

AMUSEMENTS COMBINED WITH
PRACTICAL LESSONS MAKE
LEARNING A PLEASURE.

Winthrop College, December 1:—Monday evening, November 27, Mr A O Bauer, director of music at Winthrop College, gave his piano recital. It was attended by a large and appreciative audience.

Our Thanksgiving holiday was pleasantly spent by everyone. Mr C Edward Johnson conducted an interesting Thanksgiving service in the auditorium, at which offerings were taken to defray the expenses of a dinner which was served to the mill children. A number of old Winthrop girls came back to spend Thanksgiving day. The effect of the long rows of tables in the dining hall at dinner time was very beautiful. Mrs Cobb served us turkey, cranberry sauce, fruit cake, ice cream, five or six kinds of fruit, candy and various other things. She had all the tables artistically decorated with leaves and ivy vine.

Dr Johnson is in Houston, Texas, where he addressed the Southern Educational association on the subject: "Education of young women in the South", on the evening of November 30.

Dr G A Burress, of Virginia State Normal school, was here last week looking over our buildings.

The Practice Home at Winthrop College opened in the fall of 1909. It stands for better homes, more attractive home life, intelligent home making, and is the joy of Winthrop College. It is designed primarily to help Winthrop girls to overcome the difficulties of house-keeping and indirectly to aid in lessening the difficulties in all of the homes in our State, especially country homes, no device being used that is not available in the country home. Only seniors have work in the home. They organize their own little "house parties," thus securing congenial "families," and go in groups of eight to live in the home for eight days of each term. During these eight days a system of rotation each girl has opportunity to do, with supervision and instruction, all the work of a primary home. It is so systematically ordered that no one finds it a hardship, although the regular duties go on as usual.

Very well organized household observe heaven's first law, or, "The Practice Home illustrates what may be accomplished by reducing the work of the home to a system and order.

In addition to indoor work there is opportunity for work in the vegetable garden, in the poultry yard, with flowers and with bees.

were kerosene lamps. Since this is the method of lighting most country homes it is essential that every girl should know how to care for lamps and get the best results. However, the Practice Home should be in advance of the average country home, showing what is best, and holding out something to work toward. Consequently the hollow-wire system of lighting with gas has been introduced—a system available in any country home.

"Learning to do things well, reducing the work of the home to system and order and making the proper use of labor-saving devices are to revolutionize the country home."

E H.

Lightning Kills Few.

In 1906 lightning killed only 169 people in this whole country. One's chances of death by lightning are less than two in a million. The chance of death from liver, kidney or stomach trouble is vastly greater, but not if Electric Bitters be used, as Robert Madsen, of West Burlington, Ia, proved. Four doctors gave him up after eight months of suffering from virulent liver trouble and yellow jaundice. He was then completely cured by Electric Bitters. They're the best stomach, liver, nerve and kidney remedy and blood purifier on earth. Only 50c at M L Allen's.

Hints from Hebron.

(Received too late for last week's issue.)

Hebron, November 27:—Mr Fred Coker of Darlington and his brother, Mr Archie of Columbia, are here for an extended visit to their parents, Mr and Mrs Myers Coker.

Miss Essie Thomas left Sunday for her brother's home near Single, where she will remain until the first of the year, when she will leave for Florence to take a course as a trained nurse.

Mr Cecil H Wilson of Sumter was here in his auto Friday of last week.

Messrs "Bunk" and Ed Johnson of Lake City were noted here Sunday.

Messrs Dave Thomas and Mack Wilson called on some of the young ladies near Moore's X Roads Sunday afternoon.

Mr H Baker and sons, Harvey and Clyde, spent Saturday at Kingstree on business.

Well, I see some of the correspondents have turkey and yams for Thanksgiving, but the writer has a fine fat 'possum. X Y Z.

We wish to call your attention to the fact that most infectious diseases, such as whooping cough, diphtheria and scarlet fever, are contracted when the child has a cold. Chamberlain's Cough Remedy will quickly cure a cold and greatly lessen the danger of contracting these diseases. This remedy is famous for its cures of colds. It contains no opium or other narcotic and may be given to a child with implicit confidence. Sold by All Dealers.

It is not good for hens to dust in coal or wood ashes only, some folks claim, but we find that a few ashes lighten up the dirt.

BISHOP KILGO PRESIDES OVER M.E. CONFERENCE

SOUTH CAROLINA'S HIGHEST EC-
CLESIASTICAL OFFICIAL ON
HIS NATIVE HEATH.

Bennettsville, November 29:—Bishop Kilgo called the Methodist Conference to order Wednesday morning at 9:30 o'clock. In keeping with the time-honored custom, the membership of the Conference took part in the communion service, and spent an hour in exercises seen nowhere except at a Methodist annual Conference.

At the altar this morning occurred an incident that will live forever in the memory of those who were present. Rev T J Clyde, one of the best loved men of the Conference, was the senior preacher on the Bennettsville circuit when the present Bishop, on his first appointment, served the same charge as junior preacher. Rev Mr Clyde came forward and knelt at the altar. The Bishop, overcome this morning with the memories of other days and the spiritual uplift of the sacred hour, threw his arms around the form of his life-long friend, and the two communed as only strong men can.

Rev E O Watson was re-elected secretary of the Conference, with the following assistants: Revs A E Holler, W L Wait and S B Harper. Rev R E Turnipseed was re-elected statistical secretary, with the following assistants: Revs Marion Auld, R E Sharpe and J R T Major.

Rev. S P McGhee, of Laurens, got the floor, and in an attractive and striking manner presented Bishop Kilgo with a handsome gavel. The bowl is made of wood from the pulpit desk of the old church at Laurens, the birthplace of the Bishop. It was at that desk that the sainted father of the Bishop stood and preached. The handle of the gavel is made of locust from a tree on the campus of old Lander college. Bishop Kilgo was a close friend of Dr Lander and of Dr Jno O Willson, the president of Lander college, and has always taken great interest in the welfare of that institution. The silver mountings are presented by the Bennettsville church through its pastor, Rev R E Turnipseed. The remarks of the Bishop in accepting the gavel were characteristic and appropriate.

The morning hour was taken up largely with the reports from the presiding elders. Bishop Kilgo seemed to be laying special emphasis upon the importance of the educational work of the church and required special reports along this line. The general reports of the presiding elders show large increase in membership in the church during the past year, healthy growth in the mission work and improvement in church property, and the erection of many new churches, all the conference claims being generally reported as having been well met.

The preachers of the Anderson, Charleston and Cokesbury districts were called and favorable reports from the respective presiding elders being made, the several preachers were "passed." Detailed reports were not required from the ministers in charge at this time.

Dr J D Hammond was introduced to the Conference and made a short address in behalf of Paine Institute. He showed the immediate needs of the school, and a collection was taken amounting to \$200.—The State.

Draw up about the fire a little closer. Nice in here, even when the wind is high outside.

A Des Moines man had an attack of muscular rheumatism in his shoulder. A friend advised him to go to Hot Springs. That meant an expense of \$150.00 or more. He sought for a quicker and cheaper way to cure it and found it in Chamberlain's Liniment. Three days after the first application of this liniment he was well. For Sale by All Dealers.

Noon is a good time to supply the stock with some green stuff, such as cabbages or roots of any kind. The latter can be cut in half, and the hens will then pick them to pieces.

HUNT'S
Lightning OIL

is the one unfailing scientific dressing which instantly relieves and permanently cures all hurts, cuts, burns, bruises, sprains and wounds of every kind. Pain leaves at once because the air is excluded, and the oil covering acts as artificial skin. The quickest, fastest healing oil known—HUNT'S LIGHTNING OIL. 25 cents and 50 cents bottles.

LOUIS COHEN & CO.

Science has developed something infinitely better than the old style wrap or clamp.
"Pittsburgh Perfect" FENCES
Are Welded by Electricity

This is the modern method of construction. Years of life are added through the elimination of serious fence defects.

A wrap holds moisture, cracks the galvanizing and allows the water to attack the bare wire. A small amount of displaced galvanizing on "PITTSBURGH PERFECT" reinforces the protection against rust at the electrically welded joint; examine the joint. Splices cannot slip. They are always just where they were put. Stay and strand wires become one piece when the union is made. The fence is like a solid sheet of perforated steel.

Every Rod Is Guaranteed Perfect

Don't allow your prejudice in favor of the rapidly-declining and now antiquated methods you have heretofore known, to warp your good judgment.

"Pittsburgh Perfect" Fences represent progress, because hundreds of thousands of dollars worth of standard material is daily welded by electricity.

The hoop on the average sugar barrel in the isolated country grocery store is an electrically welded product. If your wagon was made in a large factory, its tires were welded by electricity. You will find electrically welded hoops on ice cream freezers and washing machines, on many tubs and buckets. Examine them.

"PITTSBURGH PERFECT" fences are made by this modern, simple and marvelous process, producing "THE WELD THAT HELD."

Mr. Farmer LISTEN NOW! Every agent handling "PITTSBURGH PERFECT" fences is authorized to guarantee this fence is perfectly adjustable to uneven ground—That the fence is not separate from the strands.—That the fence is all right in every particular.

Could you ask any more definite protection? Your complete satisfaction is absolutely assured.
