ASK FARMERS TO INCREASE WHEAT

SOUTH CAROLINA CONGRESSMEN TO CONDUCT QUICK CAMPAIGN BEGINNING SATURDAY.

Columbia, November 19:—At the urgent request of Governor Manning, W W Long, chief farm demonstration agent, and D R Coker, United States food administrator for South Carolina, the South Carolina delegation to the lower branch of Congress will carry out an intensive campaign of speeches in behalf of winter wheat. This plan was agreed upon at a conference held this afternoon in the Governor's office with A F Lever, of the Seventh district; Fred H Dominick, of the Third district; James F Byrnes, of the Second district, and Mr Long present. Three other Congressmen, R S Whaley, W F Stevenson and J W Ragsdale, will join in the campaign, the matter having been presented to them by telephone. Sam J Nicholas is out of the State in the West.

The meeting will be held with the primary purpose of reaching the farmer, and to that end it was decided that as far as practicable the meetings be held in the smaller towns. Itineraries for the six Congressmen are being made and will be announced later. The meetings will be advertised through the well-organized channels of the State Council of Defense and through the extension department of Clemson College.

The slogan of the campaign, which will start Saturday, will be "Two acres of wheat to the plow." Such a campaign is necessary because of the general situation in the wheat market, coupled with the demands of the armies and the delays of transportation.

A Bad Year for Ticks.

Washington, D C, November 19:—Here are some of the reasons why December 1, 1917, will a memorable day in the Southern States:

An area greater than ever before freed from federal quarantine against the cattle fever tick will have been released between March and December.

More than half of the 728,565 square miles heavily infested in 1906 will have been pronounced clean.

Farmers will be free to ship their cattle to the great markets for competition on their own merits with other cattle, and not under the quarantine handicap which requires sale at buyers prices for immediate slaughter.

Cattle will increase in value, weight, milk production, appearance, health, productivity and length of life.

Farmers will be able to bring to their farms better stock and thus raise the standard of their herds.

The Southern States will have taken big strides toward their position as a great cattle-raising country, to which their natural advantages entitle them.

While South Carolina does not share in the record-breaking releases from cattle-tick quarantine authorized for December 1 by Secretary of Agriculture D F Houston, the tick work in that State has shown such progress that department of agriculture officials believe it can be finished in 1918, and that all of the State then can be placed in the free area.

The counties still under quarantine are Beaufort, Berkeley, Charleston, Colleton, Dorchester, Georgetown, Hampton, Horry, Jasper and Williamsburg.

On July 1, 1906, forty-four counties were under quarantine: 34 have been released. The area quarantined on July 1, 1906, was 30,495 square miles. The area released since then is 21,876 square miles, or 72 per cent of the State.

An order signed by Secretary of Agriculture Houston directs releases on December 1 for 65,520 square miles in nine Southern States, Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, Oklahoma, and Texas. These releases will be the greatest ever authorized at one time and will boost the releases for the year to 70,754 square miles. December 1 will be the greatest day and 1917 will be the greatest year, in the fight against the cattle tick since the co-operative State and federal campaign began actively in 1905. Celebrations are announced to be held in many localities.

Notable in connection with the December 1 releases will be the fact that a broad wedge of tick-free territory will be pushed through the tick lines to the Gulf of Mexico. This avenue will lead through Mississippi, all remaining counties of which are to be taken from under quarantine. Because of the great progress this year leaders of the tick fight believe their goal of "a tick-free South in 1921" is near realization.

Bone Valley Brand

PULVERIZED

Untreated Phosphate.

Bone Valley Phosphate when properly used will greatly increase the production of farm products. Phosphate alone is not a complete fertilizer. It does not contain ammonia or potash, but it does contain a high percentage of phosphoric acid, which is one of the three essential plant foods. It should be used in connection with something that will supply ammonia and potash. Cover crops of velvet beans, soy beans, cowpeas, clover or any of the leguminous crops plowed into the soil will supply a sufficient amount of ammonia and potash. In the absence of cover crops, use cotton seed meal tankage or stable manure. On muck lands or lands well filled with humus (decaying organic matter) phosphate alone is sufficient.

An average crop of velvet beans will supply per acre approximately 150 pounds of ammonia and 50 pounds of potash. This is equal to more potash and nearly four times as much ammonia as is supplied in a ton of commercial fertilizer of the usual formulae commonly known as 8-2-2.

At the present market price (1917) of fertilizer material, a crop of velvet beans plowed in is worth in nitrogen approximately \$36.00 and in potassium about \$24.00, or a total of \$60.00 in increased fertility, due to the plowing under of a crop of these beans, to say nothing of the value of the humus added to the land, but ammonia and potash alone is not a complete fertilizer. Phosphorus or phosphoric acid, as it is commonly known, is essential to plant life. This element can be supplied from a number of sources; a ton of 16 per cent acid phosphate will supply 320 pounds of phosphoric acid at a cost of approximately \$19.00. A ton of 23 per cent bone meal will supply 460 pounds of phosphoric acid at a cost of approximately \$45.00. A ton of **Bone Valley Phosphate** will supply **640 Pounds of Phosphoric Acid** at a cost of \$16.00 delivered.

HANDS, ARMS, LIMBS ASLEEP

And Was Run-Down, Weak and Nervous, Says Florida Lady.
Five Bottles of Cardui Made Her Well.

Kathleen, Fla.—Mrs. Dallas Primo, of this place, says: "After the birth of my last child...I got very much run-down and weakened, so much that I could hardly do anything at all. I was so awfully nervous that I could scarcely endure the least noise. My condition was getting worse all the time..."

I knew I must have some relief or I would soon be in the bed and in a serious condition for I felt so badly and was so nervous and weak I could hardly live. My husband asked Dr. Cardui about my talking Cardui. He said, "It's a good medicine, and good for that trouble," so he got me 5 bottles...After about the second bottle I felt greatly improved...before taking it my limbs and hands and arms would go to sleep. After taking it, however, this poor circulation disappeared. My strength came back to me and I was soon on the road to health. After the use of about 5 bottles, I could do all my house-work and attend to my six children besides."

You can feel safe in giving Cardui a thorough trial for your troubles. It contains no harmful or habit-forming drugs, but is composed of mild, vegetable, medicinal ingredients with no bad after-effects. Thousands of women have voluntarily written, telling of the good Cardui has done them. It should help you, too. Try it. E 74

Registration Notice.

The office of the Supervisor of Registration will be open on the 1st Monday in each month for the purpose of registering any person who is qualified as follows:

Who shall have been a resident of the State for two years, and of the county one year, and of the polling precinct in which the elector offers to vote four months before the day of election, and shall have paid, six months before, any poll tax then due and payable, and who can both read and write any section of the constitution of 1895 submitted to him by the Supervisors of Registration, or who can show that he owns, and has paid all taxes collectible on during the present year, property in this State assessed at three hundred dollars or more.
B E CLARKSON,
Clerk of Board.

Five hundred bushels government inspected seed oats on hand at

"Our Boss"

the satisfied customer

We are always anxious to save money for our customers by showing them how to get more years of wear from their paint jobs. That's why we recommend

DEVOE
THE GUARANTEED
LEAD AND ZINC PAINT
FEWER GALLONS - WEARS LONGER

It contains no whitening, silica, china clay or other such stuff. It is made of the same pure ingredients that the old-time painter used: Pure White Lead, Pure White Zinc, Pure Linseed Oil, and nothing else. DEVOE is mixed by machinery, 500 gallons at a time. That makes it absolutely uniform in strength, color and covering capacity—always.

Let us tell you how little it will cost to paint DEVOE.
