#### Uncle Sam's Savings Stamps.

The government scheme to raise money by war savings stamps and thrift cards ought to stop some money that now goes to waste. It will not merely buy uniforms for a good many soldier boys, but some people will acquire the thrift habit who formerly could not save a dollar.

There are many persons having fairly good incomes who can never

keep money on hand for regular bank deposits. When the roll in the bureau drawer gets up to 10 or 20 dollars, they feel rich. Then something comes to their minds that they want. They unroll their wad and their savings melt away. They console themselves with the idea that next quarter they will do better. By that time new and unforeseen uses for money have turned up. These people might easily spare a

dollar a week though they could never save \$50 a year in lumps. A small sum each week means simply less for shows or tobacco or candy or other superfluities and they don't feel it.

Saving is a matter of habit and if not begun early in life it comes hard. The boy who becomes used to salting away a dime or a quarter weekly out of his little earnings, doesn't feel comfortable when he

fails to do it. The sense of a little capital growing all the time gives him more satisfaction than the pleasure the money would give him. Then when he grows up he does it easily, and as earnings increase; his savings increase also.

The large success the banks have had with their Christmas and vacation clubs illustrates how people can acquire the habit. Now the government proposes to make it easier

than ever. You have not got to hoard up a large roll of money, but simply buy one or more 25-cent savings stamps with the loose change in your pocket, and put it on Uncle Sam's Thrift card.—*Florence Times*.
