Cannot Praise this Remedy too Highly

THE WAY ONE LADY FEELS AFTER SUFFERING TWO YEARS

Judging from her letter, the misery and weakness suffered by Mrs. Charlie Taylor, R. F. D. No. 1, Box 144, Dillon, S. C., must have been terrible. No one, after reading her letter, can continue to doubt the great healing power of PE-RU-NA for troubles due to catarrh or catarrhal conditions in any part of the body. Her letter is an inspiration to every sick and suffering man or woman anywhere. Here it is: "I suffered two years with catarrh of the stomach and bowels. Tried to get the best doctors, who gave me up. I then took PE-RU-NA and truthfully say I am well. When I began to use PE-RU-NA, I weighed one hundred pounds. My weight now is one hundred and fifty. I cannot praise PE-RU-NA too highly, for it was a Godsend to me. I got relief from the first half bottle and twelve bottles cured me. I advise all sufferers to take PE-RU-NA."

As an emergency remedy in the home, there is nothing quite the equal of this reliable, time-tried medicine, PE-RU-NA. Thousands place their sole dependence on it for coughs, colds, stomach and bowel trouble, constipation, rheumatism, pains in the back, side and loins and to prevent the grip and Spanish Flu. To keep the blood pure and maintain bodily strength and robustness, take PE-RU-NA.

You can buy PE-RU-NA anywhere in either tablet or liquid form.

Ask the ten best dairymen you know!

"Do you feed on Pasture?"

Their answers will convince you that the big producers don't depend upon grass, but find it necessary to supply elements that properly balance it. Most grass is so deficient in protein that a cow would have to eat several times her capacity to obtain enough protein for her maximum production—grass is practically never balanced.

This is why repeated tests have shown that the average cow on pasture will produce

6 lbs. more milk per day

when fed Purina Cow Chow. This increase is obtained at an additional cost of about 6c per day per cow. Figure what this would mean to you for a week or a month.

Purina Cow Chow

accomplishes this because it contains such milk makers as linseed meal, gluten feed from corn, hominy feed, molasses, cottonseed meal and western alfalfa meal.

Prove that you can increase the milk flow six pounds per day by putting Purina Cow Chow to the test. Ample stock on hand.
