THE SUMTER WATCHMAN, Established April, 1850.

THE WATCHMAN AND SOUTHERN, Established June, 1850.

THE WATCHMAN AND SOUTHERN, Established June, 1850.

Consolidated Aug. 2, 1881.

SUMTER, S. C. TUESDAY, SEPTEMBER 4, 1883.

New Series—Vol. 11, No. 5.

The Watchman and Southern.

Published every Tuesday,
BY THE
Watchman and Southern Publishing
Company,
SUMTER, S. C.

TERMS:
Two Dollars per annum in advance.
ADVERTISEMENTS.

One Square, first insertion.....\$1.00
Every subsequent insertion.....50c
Contracts for three months, or longer will
be made at reduced rates.

All communications which are private
interests will be charged for as advertisements.
Obituaries and tributes of respect will be
charged for.

Marriage notices and notices of deaths published
free.

For job work or contracts for advertising
address Watchman and Southern, or apply at
the Office, to
N. C. GREEN,
Business Manager.

WHEN MARY WAS A LASSIE.

The maple trees were tinged with red,
The birch with golden yellow;
And high above the orchard walls
Hung apples rich and mellow;
And that's the way, through yonder lane,
That looks so still and grassy—
The way I took one Sunday eve,
When Mary was a lassie.

You'd hardly think that patient face,
That looks so thin and faded,
Was once the sweetest one
That ever heart shined;
But when I went through yonder lane,
That looks so still and grassy,
Those eyes were bright, those cheeks were
fair.

When Mary was a lassie,
But many a tender sorrow,
Add many a patient care,
Have made those furrows on the face
That used to be so fair.

Four times to yonder churchyard,
Through the lane so still and grassy,
I've torn and laid away our dead,
Since Mary was a lassie.

And so you see, I've grown to love
The wrinkles more than roses;
Earth's winter flow is sweeter far
Than all Spring's dewy posies;
They'll carry us through yonder lane
That looks so still and grassy,
As down the lane I used to go,
When Mary was a lassie.

"Light in Dark Places"

Under this head the N. Y. Sun of
Aug. 23rd, prints some heretofore
unpublished letters written by the
late James A. Garfield, in the cam-
paign of 1880. Commenting edito-
rially upon them the Sun says:

The letters from Gen. Garfield,
as G. Blaine, Thomas C. Platt and
others, printed elsewhere, corroborate
much that has been revealed by Sen-
ator Dorey. It seems that Gen.
Garfield esteemed the ex-Senator so
highly that he was willing to write
his letter of acceptance without
consulting with him.

The letters also throw new light
upon the campaign in Indiana in 1880.
Gen. Garfield wrote to Gov. Jewell
on July 19th of that year that "Mr.
New had made an important side
issue the General's arrangement with
reference to the campaign there,
Garfield strongly endorsed it. What
the side arrangement was is indi-
cated in Mr. New's correspondence.
In writing to Gov. Jewell on Aug.
30, he says: "That Wabash road
matter is of very great importance,
and I am glad you accomplished so
much. I hope that you can be equal-
ly successful in our other roads. Sec-
retary Sherman is a director in Pitts-
burgh and Fort Wayne, wonder if
he would help us. Gould can con-
trol a couple of (railroads), and the
Cleveland parties, Deveraux and
Hurlbut, two others. Garfield can
work the Cleveland people. These
roads are significant in view of the
car lines of operators seen by Sen-
ator Ecclesine and others en route to
various points in Indiana. They are
made more significant by Senator
Thomas C. Platt, who wrote to Dor-
sey: "I will enclose a letter to Dor-
sey (now President of the New York
Central Railroad), and you can see
him. If he refuses, call upon Mr.
Blanchard of the Erie, who will do
you as well." These expressions cer-
tainly indicate that the Republican
candidate for President, as well as the
National Republican Executive Com-
mittee, knew how a portion of the
\$400,000 thrown into Indiana was to
be spent.

"There seems to have been a strug-
gle for the vast sums of money raised
to buy the success of the National
Republican ticket. Stevens L. Wood-
ford and the Rev. J. R. Thomas
wanted \$50,000 in West Virginia,
Senator John F. Lewis, of Virginia,
appeared for \$50,000 for the State.
Mr. Blaine made a plaintive cry for
Maine, and Gov. Foster and Richard
Smith asked for \$50,000 in Ohio. Mr.
Smith advised not to contribute of this
sum be reserved for use at the polls
on election day. Dorey has lately
asserted that this was done in Indi-
ana. While the reporters were hard
at work, other voters were bought at
the polls like sheep in a slaughter.

That Gen. Hancock was defeated
by the use of large sums of money,
illegally expended by Indiana and
elsewhere with the knowledge of Gen.
Garfield and the managers of his cam-
paign, no longer admits of a doubt.
It is proved by the letters of the man-
agers themselves.

The popular belief that the concrete
rings in the cross-section of a tree show
its age need not be shaken. A recent
argument to the contrary, according to
an Ohio lawyer's letter on the subject,
is in the trial of a large number of late
grant cases, he says, "it very fre-
quently became important to show the
date of the survey. This was shown by
the endorsement on the document, and
corroborated by an examination of the
backs on the line and corner trees of the
survey. These backs invariably left a
scar, which, to the practical surveyor,
was readily detected, even after the
lapse of sixty years. By blocking the
tree and counting from the back made
by the surveyor to the outside of the
tree, it invariably corresponded with
the date as they appeared upon the re-
turns made by the surveyor."

Volcanic Disturbances.

A dispatch from Batavia, Java, says
the towns of Anjer, Iperingie and
Telaklong have been destroyed by
volcanic eruptions. It also says that
all the light-houses in Sunda Straits
have disappeared, and that where the
mountain of Kramar formerly stood
the sea now flows. The aspect of Sunda
Strait is much changed and naviga-
tion is dangerous.

Another dispatch, dated the 29th,
says: "A tidal wave completely destroyed
Anjer. Many persons there were
killed. The loss of life among both
Europeans and natives at North Bata-
van was enormous. Since noon yesterday
everything has been quiet. The sky is
clear and communication with Strong
has been restored. The temperature
fell ten degrees Monday, but it is now
at its normal height. The town is cov-
ered with a thin layer of ashes, which
was so hot when falling that it killed
birds. Telegraph lines report that
while they were at work repairing a line
near Anjer early Monday morning
they saw a high column of a scarp of
teaching, with a roaring noise. They fled
immediately, without learning the fate
of the inhabitants. Quarries at Merak
have disappeared, and all the people of
that place have perished. A floating
dock at the Island of Oronout, near
Batavia, is afloat and is badly dam-
aged."

Picking up Broken Cables.

The laying of telegraphic cables is
now so common that the description,
as given in some detail, of the ma-
chine for picking up a broken cable
will be read with interest. It consists
of a rope about an inch and a quarter
in diameter, made from the strongest
hempen, with interwoven wires of iron-
steel. The grapple at the end is
merely a solid shaft of iron, some two
feet long, and weighing about 100
pounds, and prolonged into six blunt
hooks, which much resemble the per-
forated fingers of the human hand.
In picking up the cable in deep
water, the vessel, after reaching the
waters near the break, lets out the
grapple, then takes a course at right
angles to the cable, and at some dis-
tance from the fracture, so that the
broken ends may not slip through the
grapple. The grapple is attached
to a dynamometer, which exactly
measures the strain on the rope, and
shows instantly when the cable has
been caught. If the grapple fails a
hook the strain rises very suddenly to
a high point; but the exact weight of
the cable being known, the dynamo-
meter signals by the steady rate of
increase as laid on the cable far be-
low. The ease and certainty with
which cables are picked up in these
days is a matter. A while ago one of
the lines of the Anglo-American Com-
pany was caught without trouble at a
depth of two and a quarter miles
near the middle of the Atlantic. Cap-
tain Trott, of the Minia, who has won
great fame for his skill and ingenuity
in cable matters, but recently picked
up the French cable 180 miles off St.
Pierre, and in four hours, from the
time the grapple was let go, had the
cable spliced and in working condi-
tion. The solution is a work of great
difficulty and skill, and when accom-
plished by trained fingers the splintered
cable can scarcely be distinguished
from the main end.—London News,
New York.

The Fireman's Feat.

We have many close shaves, and an
old-fashioned engineer, that after the
engine is over a person will remark
something that is said or done that
will excite him to laugh in silent am-
usement. I was once running a freight
engine on the Valley Road.
The train behind me was, just after
a heavy rain, was a running thing
of mud and water. The fireman, who
was a tall, thin man, with a face
like a piece of leather, and a pair of
trunk legs, was a perfect specimen
of a fireman. He was a perfect spec-
imen of a fireman. He was a perfect
specimen of a fireman. He was a per-
fect specimen of a fireman. He was a
perfect specimen of a fireman. He was
a perfect specimen of a fireman. He
was a perfect specimen of a fireman.
He was a perfect specimen of a fire-
man. He was a perfect specimen of a
fireman. He was a perfect specimen of
a fireman. He was a perfect specimen
of a fireman. He was a perfect spec-
imen of a fireman. He was a perfect
specimen of a fireman. He was a per-
fect specimen of a fireman. He was a
perfect specimen of a fireman. He was
a perfect specimen of a fireman. He
was a perfect specimen of a fireman.
He was a perfect specimen of a fire-
man. He was a perfect specimen of a
fireman. He was a perfect specimen of
a fireman. He was a perfect spec-
imen of a fireman. He was a perfect
specimen of a fireman. He was a per-
fect specimen of a fireman. He was a
perfect specimen of a fireman. He was
a perfect specimen of a fireman. He
was a perfect specimen of a fireman.
He was a perfect specimen of a fire-
man. He was a perfect specimen of a
fireman. He was a perfect specimen of
a fireman. He was a perfect spec-
imen of a fireman. He was a perfect
specimen of a fireman. He was a per-
fect specimen of a fireman. He was a
perfect specimen of a fireman. He was
a perfect specimen of a fireman. He
was a perfect specimen of a fireman.
He was a perfect specimen of a fire-
man. He was a perfect specimen of a
fireman. He was a perfect specimen of
a fireman. He was a perfect spec-
imen of a fireman. He was a perfect
specimen of a fireman. He was a per-
fect specimen of a fireman. He was a
perfect specimen of a fireman. He was
a perfect specimen of a fireman. He
was a perfect specimen of a fireman.
He was a perfect specimen of a fire-
man. He was a perfect specimen of a
fireman. He was a perfect specimen of
a fireman. He was a perfect spec-
imen of a fireman. He was a perfect
specimen of a fireman. He was a per-
fect specimen of a fireman. He was a
perfect specimen of a fireman. He was
a perfect specimen of a fireman. He
was a perfect specimen of a fireman.
He was a perfect specimen of a fire-
man. He was a perfect specimen of a
fireman. He was a perfect specimen of
a fireman. He was a perfect spec-
imen of a fireman. He was a perfect
specimen of a fireman. He was a per-
fect specimen of a fireman. He was a
perfect specimen of a fireman. He was
a perfect specimen of a fireman. He
was a perfect specimen of a fireman.
He was a perfect specimen of a fire-
man. He was a perfect specimen of a
fireman. He was a perfect specimen of
a fireman. He was a perfect spec-
imen of a fireman. He was a perfect
specimen of a fireman. He was a per-
fect specimen of a fireman. He was a
perfect specimen of a fireman. He was
a perfect specimen of a fireman. He
