Death at all times and under all circumstances is sad, but to die far from home, from kindred and friends, with no loving hands to soothe the last hours is sad indeed. Major Hay, a Virginian by birth, who represented the Vally Mutual Life Insurance Company, of Staunton, Va., and who was thrown from his buggy a few miles from town on the Lynchburg road, and received serious injuries, died at the residence of Mr. J. W. Woodham on last Sunday night. Mr. Woodham He paid Sumter a visit last week before he and family did all in their power to alleviate his suffering until death came to his relief. His remains were taken to Charleston for interment. To the broken hearted wife we extend our heartfelt sympathies .- Bishopville Enterprise.

> Death of Dr. G. Allen Huggins, of Manning. A special dispatch to the News and Courier

from Manning, March 2, says: All Manning is in sorrow at the death of one of her noblest and best men, Dr. George Allen Huggins, Sr., who departed this life at twelve minutes past 6 this afternoon after an illness of four weeks. He was one of the earliest settlers of the town, and one of her prominent lawyers, being a partner of Gen. E. W. Moise, of Sumter. His funeral takes place to-morrow afternoon at 4 o'clock. The town has suffered a severe loss, and the sorrow at his untimely death is universal.

Burnt to Death.

Alice, a fourteen year old daughter of Mr. Wm. B. Norton of the Privateer neighborhood, died yesterday morning from the effects of burns received the day before while at work family. She was engaged in clearing off some dead cotton stalks when her clothing caught fire from some burning grass.

Peggy Richardson, an old colored woman pressed for time. that she died vesterday.

Fire. On last Sunday afternoon Mrs. E. A. Brown's residence, situated about five miles North of Sumter, was burned to the ground. Only a few articles of little value to the the house, with this exception, including the family groceries and \$22 in money, were lost in the flames. Mrs. Brown also lost her buggy shed, her buggy harness, and plow gear

It is thought that the house caught on fire from the chimney, and it was reduced to ashes in less than fifteen minutes from the time that it was discovered to be on fire. The house was insured for a small amour ..

Lenten Services.

We are requested to announce that there will be service at the Church of the Holy Comforter, Sumter, every Tuesday, Wednesday and Friday during Lent at 4.30 o'clock, p. m. Also every Thursday at 11 o'clock at Church of the Holy Cross, Stateburg.

A Distiguished Visitor.

Superintendent J. H. Rice came to Sumter on last evening for the purpose of making an address on the subject of Public Eeducation, but was prevented from doing so on account of other engagements for the evening. Before his departure for Bishopville where

he will deliver an address on to-morrow. He visited the Public Free School. Monte Cristo.

The Monte Cristo Company was greeted by a large audience in Music Hall on last evening. The Drama was well rendered and took immensely with most of the audience. We must say, however, that the "startling sensation," which was revealed in the Fourth Act, was unpleasantly startling to those who do not favor the introduction of a scene which smacks of a Paris Code of morals.

The Wednesday Club. The Wednesday Club met at the residence of Mr. Perry Moses on last Tuesday evening. The Most Wonderful Cattle in the World Our readers who are interested in fine

stock will be glad to know that there are in our county several of the celebrated Dutch Belted Cattle, which bred has been denominated by the historian Motley as "the most wonderful cattle in the world." Mr. H. R. Thomas, of Wedgefield has now four head, and has had the breed on his fam for several years, so that they are now thoroughly acclimated. He is highly pleased with them, and is prepared to endorse what has been said of them elsewhere.

We copy the following description of these

cattle from the Breeder's Gazette : "The Dutch Belted Cattle are natives of Holland, and their breeding dates back to the seventeenth century when the cattle interests of Holland were in the most thrifty condition, and this type and color were established by scientific breeding; decidedly the highest attainment ever reached in the science of breeding. These cattle were solely controlled by the nobility of Holland, and they are to the present time keeping them pure, but are not inclined to sell or part with them. They have a broad band or belt around their body, while the rest of the body is black, making a very beautiful and imposing contrast. They are above average size, commonly known as business size. The form is usually very fine, and they are wonderfully productive as milkers, combining beauty and utility in its highest development.

BOOK-KEEPER. Matrimony a Science.

We had heard of the English Mutrimonial News, but we never before happened to see it. When seen it beggars all description and defies caricature. Here are twenty-two long and closely set columns full of advertisements for husbands or wives. The advertisers state precisely what they want, and at the same time accurately appraise themselves. Bachelor, age 36, good looking, good appearance, very affectionate, steady, salary about £150 a year, wishes to marry a lady, medium beight. rather short than otherwise, small hands and feet, loving nature, good temper. good looking or with well formed features, domesticated, with means, age from 18 to 30.' 'A man wants & woman for his wife who has or will have her first or given name only as Jane, and has good health, with all her nat-

ural and sound teeth included.' The ladies are equally precise. 'An attractive, handsome, young looking widow lady would like to meet with an honorable gentlemanly man of high social position seeking a wife with refined, pleasing manners, religious principles and unusually cultivated mind. Clara is musical fond of intellectual pursuits. Free from Injuri fully capable of being mistress of a good ous Drugs and of establishment, etc.' The fortunes of fensive odors. some of the advertisers are surprising, if the statements are genuine. One has £1,000, another has £8,000 a sorbed, effectually cleansing the nasal passayear. One lady has £250,000. Imagination fails to paint the hideousness or disagreeableness, of whatever kind it may be, which compels a lady with property wants a nobleman, and she

When 'Compound Oxygen' is inhaled, the eart has imparted to it increased vitality. That organ sends forth the blood with more force and less wear to itself; the vital currents leave on their circuit new deposits of vital force in every cell of tissue over which they pass, and return again to the lungs for a new supply. This is a rational explanation of the greatest advance medical science has 'The Compound Oxygen Treatment,' Dre.
