We have much pleasure in calling the attention of our readers to Professor Royston's advertisement which appears in this issue. His experience as teacher covers a period of twenty years and his success in Mayesville we are assured is very complimentary to him, and the successful record he brings as Senior Master of the primary department of Working College, Surry England, we trust may be accepted as an assurance that a want very severely felt in Sumter may be met.

Elsewhere on this page will be found the advertisement of that famous summer resort, Glenn Springs, whose waters have wrought some of the most marvellous cures on record. For the various types of hepatic derangement, they are almost a specific, and hundreds of persons can be found in all parts of the country who attribute their escape from impending death to a liberal use of these waters. The editor of this paper has used them with the happiest results, and he unbesitatingly urges every reader of the Enquirer whose symptoms indicate their use to try them.

#### A Young Flood.

On Sunday afternoon from about 2.30 to 4 o'clock, we had a prodigious rainfall in the city and vicinity, which flooded the streets and sidewalks and choked up the deals for neveral hours. The thirsty earth succeeded leautiful with its soft and silvery eJulgence. The moisture in the atmosphere made Monday a steaming day, but out of the sun the heat was not unendurable.

#### Quick Work.

Our Extra which was received by the public with such interest on Saturday afternoon, involved a great deal of work and the closest o attention in order to prevent typographical errors, a few of which crept in despite all our care. These we have corrected, and as published this week the returns are absolutely correct, so far as we know or have been able

to find out. When we began to print them off, the crowd in our office was so large that we were obliged to insist on their getting in line and being served in turn. The extra sold like hot cakes, and was a great source of satisfaction to the anxious candidates and their conatituents. After our labor in adding up the returns, we can readily believe the statement that several persons engaged in making up the census returns of 1880 were absolutely cruzed by their constant and incessant ad-dition of figures for months at a time. A similar statement of the result of the second primary election will be issued on
