

WEDNESDAY, JANUARY 29.

Entered at the Post Office at Sumter, S. C., as Second Class Matter.

NEW ADVERTISEMENTS.

T. R. Howle - Sole Stolen.
J. R. Harvin, Agent - For Sale.
The Bank of Sumter - Notice.
R. W. Durant & Son - A Card.
S. W. Ruffin - Miles Cows for Sale.
B. F. Bellinger - We can be Found.
B. F. Bellinger - A Card of Thanks.
Brown & Chandler - The Atwood Suspender.

Mr. Bob. Haysworth was in the city last week.
Our friend, Isadore Hoyt, is getting well and will soon be himself again.
The Rev. Father J. J. Monaghan is spending a few days with his relatives here.
Miss Abby Dick is in the city in the employ of Luken & Reiffnyder.
Miss Mary Mulligan, of Charleston, is visiting the family of Mr. E. P. Koonshon.
Miss Lizzie Broadwell, who has been visiting in Blaine, Ga., returned home on Saturday.
Miss Ella Brown and Miss Kate Monaghan have come home from the Capital, where they have spent several weeks.
Miss Annie Lucas, from South Sumter, Miss Maudie Atkins, from Myrtleville, and Miss Julia Deveres, from Charleston, are visiting the family of Mr. N. G. Osteen.
Prof. V. R. Pringle, of the White Graded School, has been the pet of "La Grippe" for several days, but has managed to keep free from the disease and expects to be in his chair very soon. We congratulate him and his class, as well as Prof. Duffie who has had double trouble.
Mr. Mitchell Levi has left Sumter and gone in business with his brother at Sumter. Mr. Levi, Mr. Mitchell Levi will be a great addition to his brother, Mr. Ferdinand Levi's business, which is already one of the most flourishing in the young city of Sumter. *Chancellor* Advertiser.
Mr. Ed. Miller, from Salem, N. C., and Mr. John Backe, from Columbia, are assisting Mr. J. Strauss at the Palace Saloon.
Mr. Miller is an expert at his business, and can tick the taste of those who like "mixed drinks." "The Bishop" is one of his specialties.
The butchers want the Council to appoint regular hours for the market to be open.
The progress of Miss Waddell's eye pupils is remarkable; her parents tell us. She is patient and thorough.
At his own expense our postmaster, G. W. Reardon, has made the post office a most attractive place. His assistants are always prompt and obliging.
Messrs. Wood and Chief Marshal Harry Proctor were on duty at the emergency, and are fast clearing away the dangerous obstructions of the great fire.
The Electric Girl wanted to have another fire on yesterday, and made it impossible for Mr. Proctor's kitchen. It was discovered in time, and she is to be visited elsewhere by wonder-seekers.
We thank the Hon. M. C. Butler for a copy of his masterly address on Emigration of Colored Persons, and wish that it might be studied without party spectacles by thinking men everywhere.
The national flag unfurled on our public school buildings? We like the idea, although the suggestion comes from the adversary of our glorious Union. It is the flag of our fathers, and our children should be taught to love it.
Adam Wilson, a young colored man attending Allen University, at Columbia, had his studies interrupted on yesterday by Sheriff Carson and is now lodged in our jail. The charge against him, made before a Trial Judge of the County, is an aspiration towards the paterfamilias.
Sehorn & Co., from East Tennessee, are at Epperson's Stable with Horses and Mules. Will sell 12 head of Mules and 5 Horses at auction. If you want stock worth the money the best bargain of the sale, which will be Monday, Feb. 3rd, 1890.
The State Sunday School Convention which meets at Columbia, March 4th to 6th, should be largely attended. We trust that Sumter County will be represented. The Rev. C. C. McCall is to be one of the speakers. The attention of all interested in Sunday School work is directed to the call for this convention published on our fourth page.
The Bank of Sumter, though for a short time closed, did not suspend its regular business, except for two or three hours after the fire yesterday. It opened temporarily at the office of the County Commissioner at the Court House, where it moved to its present quarters in Mr. Stubbs' cotton office. Succession elsewhere.
Citizen's Horses and Mules.
The people ought to satisfy the folks with all sorts of horses and mules, and they will find them at Grady's Stables.
Contractor R. S. Pringle.
In these days when so many want to get something for nothing, it is refreshing to meet a man after the pattern of Mr. R. S. Pringle. He is a faithful, fair-minded, and upright man, true over to the C. S. & N. R. R., and a road-bed as ever welcomed the cross-ties. He has no patent on his style of work. Painstaking, persevering and intelligent work has given him the high place he now occupies in railroad circles.

The Providence Post Office.

We learn from Mr. John Kingman the former postmaster at Providence, that Mr. Kingman, his successor, has moved the office from that place. He kindly offers to receive and distribute our paper to subscribers in that neighborhood, and we have accepted his offer, unless otherwise directed.
Prof. Raybill's Lecture.
To Institute Hall, last night, was quite enjoyable, and some of the recitations left nothing to be desired. Tension would have enjoyed and encouraged Mr. Raybill's rendition of "The Blow, Blow," which, we think, would have needed a girder round his ribs, or section, when Mr. R. gave one of A. W.'s productions interspersed with Mr. R.'s personal recitations.
The professor is not only a fine elocutionist but a most accomplished gymnast and athlete. Although he was a soldier in the famous battle of Balaklava, he has the soap and vigor of a man of twenty-five. Success to the public and political good wherever he goes. And we hope he will succeed in getting a class here.
A Glimpse of Wedgefield.
A friend who spent two days recently at Wedgefield was greatly impressed with the place, the people and the country round about. The scenery he describes as the result of a perfect compromise between the Top Country and the Low Country. Even mountains have been thrown in to help the measure to overflow. Mr. J. H. Aycock and Mr. Frank Thomas have demonstrated on a large scale that what was here better land for farming. It is strange that so little attention has been paid to fruit trees. The apple does not seem to thrive, nor does the copper-nong. The man who wants to buy land to that region should not delay making his purchase, but hurry to the place. There are no more good lands here gone to work with a good will, and they are to most excellent terms with the whites. The last, our friend added, are characterized by an exceptional amount of self-reliance and mutual self-respect.
The "Season" (C. S. N.) Railroad.
We shall here to get a Kodak to take instantaneous views of the improvements this railroad is making. The passenger depot is fast growing to be the thing of beauty its designers planned and the foundation of the large freight depot are nearly completed. Within a week one hundred tons of guano have been stored in the house built for that purpose, and several tons will be received during this week. Other things, too, to be made of. The freight business is satisfactory, and the local passenger travel is considerable.
So soon as the road-bed is made perfectly level a fast train will be put on. Already the best of the country is being run in the State, but the earnest and honest Superintendent is determined that the rough places shall be made smooth and the crooked straight before the Steam Car, on their perfect bed of wood and steel tracks, begin to perform their duty of motion, and to prove that these alone who travel in them do not disturb their sleeping undisturbed by jerk or jolt.

Love's Young Dream.

Married at Rochelle, Fla., Dec. 7, 11, a. m. T. D. Love and Miss Mary E. Kennedy, S. C., to Miss S. A. Kennedy, by Rev. W. S. Richardson, assisted by Rev. Giles. The groom, who is seventy years of age, is the maternal grandfather of commander T. H. Richardson, U. S. N., and a railroad engineer. The bride is sixty years old. Rev. Richardson is the son-in-law of the groom and the father of conductor Richardson. May peace, plenty and happiness abide with the young couple just starting out in life.—*Waycross Ga. Reporter.*

Death.

Postmaster J. J. Dickson, at Motts' Bridge, in the extreme eastern part of Sumter County, died suddenly of heart-failure on the 24th.
A telegram from Mrs. Clark to her brother, Dr. Isaac A. McKee, announces that her husband, Mr. W. J. Clark, died suddenly on Saturday night. The many friends here tender their sincerest sympathy.

Mr. John A. Miller's infant son died on Sunday night. The burial took place on Monday.
Madge, youngest daughter of Mr. and Mrs. J. B. Hall-died Friday night, the 24th, after five days illness. Her remains were interred in Tirrah Cemetery on Saturday evening.
Master Chalmers Hammett, aged about ten years, a son of J. N. Hammett, Esq., of Indian, died on the 14th instant, of cerebro spinal meningitis, after he returned from a visit to Sumter, and was apparently well, when he was suddenly attacked by the disease which soon proved fatal. He was a bright, pleasant boy, beloved by all who knew him. His decease, when death claimed him after his life had begun. Such a sudden and unexpected bereavement to the parents is inexpressibly afflictive, and their friends are tenderly moved in sympathy with them.—*Williamsburg Rec., Jan. 22d.*

The Death of Mr. A. C. H. Kopf.

From the quiet place of book-keeper in A. A. Solomon's large and well-ordered establishment in the city of Sumter, Mr. Kopf passed away on the night of January 6th, without giving any notice to his employer. It was supposed that he was off, indulging his appetite for drink and would soon be back again on the night of January 22d, according to the fact set described by the Atlanta Journal as follows:
"A. C. H. Kopf, of Sumter, S. C., committed suicide about 7:30 o'clock last night in Hollis street. His body was found by the police at 10 o'clock shortly after 7 o'clock and set down by the fire. In about fifteen minutes he arose and walked through the back door of the saloon. Thence in the place there a muffled report, and in the next breath a stream of blood flowing from a small hole in his right temple. By his side was a .32-calibre Smith & Wesson revolver with the cartridge discharged. When the police arrived the man was still lying on the floor, and the door was closed. Some papers found on his person identified him.
"Dr. Asbury, the coroner, was summoned, and after the body had been removed to the morgue, the police ordered a post-mortem was held. The dead man was positively identified by Mr. W. M. Graham, a citizen of Sumter, who has been stopping at the Markham house for a few days.
The evidence showed that Kopf had been in the city since the night of January 22d, and had pawned his silver watch for three dollars and twenty-five cents. There was not a cent upon his person, and it was believed that he killed himself in a fit of despondency.
The body was forwarded here by Mr. W. M. Graham and interred in our cemetery on Friday the 24th.
We know that the mother and sister need all the balm of their neighbors' sympathy, and we believe that they will not be forgotten by those who pray."

Religious.

The Rev. H. P. Oliver will preach at Home Branch on the first Sunday in February at 11 A. M.
A meeting of the congregation of the Presbyterian Church was held by request of the Deacons for next Sunday to decide as to the election of three Deacons and two Elders in addition to the number now serving.

A Pious Celebration of a Fire Anniversary.

At 4 o'clock on yesterday morning the alarm of fire broke the rest of our citizens. The flames were seen in the distance and a dense fog against the same time fifteen years ago. The buildings occupied by the Bank of Sumter, R. P. Monaghan and DuRant & Bellinger, were entirely destroyed. The fire began in one of the rooms over Monaghan's, and spread to the other buildings. The fire was extinguished by the C. S. & N. R. R., for an office, and there was neither store nor fireplace in which the trouble could have originated. Mr. Morgan who occupies the next room, is said to be bound to bed, at 10 p. m., he heard a continual popping noise in the office but thought it was caused by the wind which was blowing like March. There are many surmises as to the origin, but nothing whatever is positively known.
R. W. DuRant & Son had much of their hardware injured by removing it to the street, but their solid brick wall prevented them from a great calamity.
The entire loss is estimated as being between thirty and forty thousand dollars. The insurance covers \$18,000. The three buildings which perished belonged to Mr. R. P. Monaghan. These with the stock of goods he carried bring his losses up to about \$27,000, with only 14,000 protected by insurance. He will begin to rebuild at the earliest possible moment.
The Bank safe has been opened under the supervision of Mr. E. B. Duffie, and the contents found intact.
Most heartily do we thank, in behalf of the people of Sumter, the Florence firemen for their prompt answer to our appeal for help when afterwards found would not be needed.
Mr. J. F. Langley, of Luken & Reiffnyder's Printing Mill, and Mr. W. Alston Pringle, cashier of The Simons National Bank, risk their lives in saving the effects of the Bank of Sumter. We trust that Mr. L's hair and moustache will soon be as abundant as before they were burned, and that his bruised head and leg will not give him much trouble.
These gentlemen found a brother hero in Mr. John Nesford of the Steam Fire Engine. We append and endorse the comments of the News and Courier's correspondent:
Mr. John Nesford, of the steam engine fire hose, distinguished himself in the late fire. He had charge of the pipe for about seven hours, went everywhere that duty called, often risking his life. Once he was thrown backwards from a parapet with the pipe in his hand, falling about five feet, and striking upon his back, on a tin shed under which the fire was burning the rafters, and received a heavy blow on his nose. His gallantry was so conspicuous from first to last that, while the fire was going on, his friends made up a purse in the crowd and presented him after the fire was over with a handsome suit of clothes.
Our colored firemen worked, as they always do, with industry and energy until the force at the engine was completely exhausted, when the chief of police hired others to take their places and relieve them.
Mr. M. Morris' clothing store, diagonally opposite the fire, caught several times, and was as often saved from destruction by persistent effort.
Presents in the most elegant form THE LAXATIVE AND NUTRITIOUS JUICE FIGS OF CALIFORNIA, Combined with the medicinal virtues of plants known to be most beneficial to the human system, forming an agreeable and effective laxative to permanently cure Habitual Constipation, and the many ills depending on a weak or inactive condition of the KIDNEYS, LIVER AND BOWELS. It is the most excellent remedy known to CLEANSE THE SYSTEM EFFECTUALLY When once BILIOUS or CONSTIPATED. PURE FOOD, REFRESHING SLEEP, HEALTH AND STRENGTH NATURALLY FOLLOW. Every one is using it and all are delighted with it. ASK YOUR DRUGGIST FOR SYRUP OF FIGS MANUFACTURED ONLY BY CALIFORNIA FIG SYRUP CO. 425 N. E. ST. N. Y. N. Y.

The Land of Goshen.

MAYSVILLE, S. C., Jan. 24, 1890.
DEAR SIR: I send you a few Ruta Begonia samples of a crop of 200 bushels grown in a half-acre of land. They were planted the first week in August (the land having 15 loads of horse) of stable manure thoroughly plowed in and re-plowed some time previous); changed out to three or four in a hill, 10 inches apart, as soon as up to a stand. At second working, 20th Sept., three 15k ryegrass was sown. Began using turnips 15k O-T, getting 120 bushels to date, and this evening put up 130 bushels.
Five weeks ago began cutting rye for milch cows, using two 4 bushel baskets full every evening; and one can hardly see where the rye has been cut, as a plow man would say the rye is cut, and the rye will run up and head out long before the patch is gone over at the present rate.
The growth of rye is so dense that, even on the drier day of this winter, the rye did not get so much as the other crops. The rye will be the new rye in its best. I will give you the best formula for a butter ration that I ever tried: 2 qts. corn meal, 2 qts. cow pea meal, and 2 qts. soy. I have rearing one cow; 2 bushels given her, and 50 lbs. peas in hay per day for her. The land of Goshen could't beat the result.
Yours truly, E. W. DABBS.
We acknowledge with thanks, the receipt of the rye samples you sent me. The rye that they are as fine both in size and favor as any I have seen.—Ed.
Letter from Qui Viva.
PISGAH, S. C., Jan. 28, 1890.
Mr. Editor: This is summer weather in spite of the thermometer in the seventies. Plum trees are in bloom, and the geese and geese show a disposition to bust their buds. I doubt if the old folks have seen just such a winter. A great many of my neighbors have lost their meat from the heat. This is the case, when death claimed him after his life had begun. Such a sudden and unexpected bereavement to the parents is inexpressibly afflictive, and their friends are tenderly moved in sympathy with them.—*Williamsburg Rec., Jan. 22d.*

Cause of Disease as Given by the Scientific Men of the Age.

Monsieur Pasteur, who for years has made his special study, first discovered that these minute insects were the cause of spreading the most deadly contagions through their astonishing rapidity of reproduction. Pasteur discovered them in myriads in human blisters, in sheep, rabbits and rats. He found that the Microbe was the direct cause of the Variolous, or small pox, Bronchitis, Yellow Fever and other contagious diseases.
The Microbe, in the form of germs, is attacked by Variolous, is thread-like, cylindrical, somewhat swelled. It is the smallest of all perfectly formed animal organisms. It breeds by the thousand per minute. Pasteur gives the details of his experiments. He discovered that the quickest way to exterminate them was by the free inhalation of Oxygen gas, or by liquids charged with that gas, but admits that in time most cases when so successful, the Microbe will not be killed by the free cutting, and the liquid must contain such gaseous combinations as will directly destroy in the human body, those germs of Microbes of disease. Doctor Lillie, a graduate member of the Royal College of Physicians and Surgeons, says:
"The idea that many of the diseases to which man and the lower animals are subjected result from the presence in the system of minute organisms or microbes is not a new one.
The introduction of the microscope, the discovery of the Yeast plant, and the successful nature of many diseases, have proved conclusively that it is directly attributable to the Germ or Microbe Theory of Disease.
The theory has positively proved that many diseases are due to the presence and propagation in the system of minute living organisms. It is essential, therefore, to be thoroughly acquainted with the class, kind, and very composition of the Germs that produce them, in order that we may know what is now termed the Pneumonia of Disease.
Contagion, Infection, is created by absolute experience and scientific experiments and proofs, by the existence of minute organisms or microbes. The Contagion, or microbe being particulate, and the minute particles being irregularly scattered about in the atmosphere, it is evident that the inhalation of them, in some degree, is sure to put a matter of chance. Yet, such inhalation, no matter how healthy and strong the man or animal thus inhaling it, will, as a matter of course, be stricken down sooner or later, unless the vital force of the body is able to overcome the contagious poisonous matter inhaled, breed into his system. To exterminate those it has been found that liquids strongly impregnated with gaseous alkali have been trained in the water, or milk, and other matters, when a liquid strongly impregnated with those substances will be discovered that will effectually destroy the microbes or Germs of Disease.
It is an organic form of such extremely minute size as to be classified under the term of Micrococcus. The Microbe is spheroidal, transparent and of a gelatinous consistence. It enters the human system by inhalation, or in the water of milk, or other matters, which we eat. It is able to stand the greatest amount of heat. By the most careful study and frequent experiments microbes have been induced, by ivory needles, into meats that are boiled, and even into water, and still retain their vitality. The Microbe has been found to be yet alive and propagating, thus showing that even cooking has no effect upon them.
Professor Tyndall says of the Microbe: They are found in myriads and countless shapes, floating in the air, destroying man, as well as beast and vegetation. The virtual triumph of the anti-septic system of surgery is based on the recognition of living contagia, or microbes, as the agent of putrefaction, and this discovery made, it behooves the closest study of the subject by the physician, surgeon, chemist, agriculturalist, in fact, by all men, to endeavor to discover some powerful liquid substance, heavily charged with some so far undiscovered gaseous substance that will penetrate through every tissue of the human, animal or vegetable system, and will be able to destroy that death-dealing pest, the Microbe.
The word Microbe was first introduced by Professor Charles Sedillot and endorsed by the great physiologist, scientist, who caused his name to be placed in the Academie des Sciences of France, and thus had it admitted as a scientific term to be used by all scientists.
Science has taught us that the direct cause of all disease is the Microbe, which is able to minute, invisible, yet death dealing insect, feeding, living on the germs of corruption inhaled, absorbed in the system, whether human, animal or vegetable.
It is a design of science as the Microbe the most deadly of all animals, propagating by millions, and spreading disease wherever it makes its appearance. The exterminator of that curse to the human race has not much to do in a science, which has devoted hours of study in each and every branch of their different researches to check the frightful inroads made by the Microbe upon whatever it attacks.
William Radam, a chemist and biologist of Austin, Tex., who from his earliest boyhood, had been brought up to take care of and watch tenderly over the plants, seedlings and slips, that were extensively grown in his father's world famous nursery, having frequently seen many of his favorite plants suddenly drop and die, was the first to make the Microbe his special study, and its extermination the object of his life.
Fortunately for Wm. Radam, he was able to command the means that enabled him to purchase the instruments, needed to perfect his experiments, as he patiently advanced in his studies of the Microbe. He was not the man to rely merely on book learning, although he closely studied the theories advanced by scientists.
William Radam, after years of patient study and analysis, found the true origin of all diseases, and by a series of experiments, inspired by Nature's close study, was able to produce what will be read below, as the extermination of the dreadful scourge, Microbe—as recommended by the greatest authorities, in fact, by the most eminent of our countrymen, who all admit, that to exterminate that pest and scourge requires just such a liquid, saturated with gases, as William Radam's Microbe Killer.
The scientific men of to-day claim and prove that every disease is CAUSED BY MICROBES, AND RADAM'S MICROBE KILLER

State of South Carolina.

County of Sumter.
By T. V. Walsh, Esq., Probate Judge
WHEREAS, JAS. D. GRAHAM, C. C. P. and G. S. for Sumter County, made suit to me to grant him Letters of Administration of the Estate and Effects of MRS. EMELINE E. SHAW, deceased.
These are therefore to cite and admonish all singular and the kindred and creditors of the said Mrs. Emeeline E. Shaw late of said County and State, deceased, that they be and appear before me, in the Court of Probate, to be held at Sumter, S. C., on the 4th day of February, 1890, at 12 o'clock, M., for the forenoon, to show cause, if any they have, why the said Administration should not be granted.
Given under my hand, this 24th day of December, Anno Domini 1889.
T. V. WALSH, [L. S.] Judge of Probate Sumter Co.

Estate of A. J. Chandler, dec'd.

I WILL APPLY TO THE JUDGE OF PROBATE for Sumter County on Feb. 24th, 1890, for a Final Discharge as Administrator of the Estate of A. J. CHANDLER, Jan. 22, 1890.—A.

Estate of Rob't H. Rembert.

I WILL APPLY TO JUDGE OF PROBATE of Sumter County on Jan. 31st, 1890, for a final discharge as Executor of said Estate.
EDWARD J. REMBERT, Executor.

PLOWS! PLOWS! PLOWS!

Large, Magnificent, New Store Adjoining A. A. Solomons.

Our increased business necessitated our leaving our former CRAMPED QUARTERS. Now with LARGE STORE AND LARGE STOCK we are prepared the better to meet the wants of our friends.
The Ladies, too, are especially invited to call and see us. We return thanks for past liberal patronage and solicit your future trade.
We buy LARGELY FOR CASH and can offer INDUCEMENTS, Always come and see us before buying your HARDWARE.
Look! Read! Buy!
We sell Agricultural Implements, Tools, Wagon and Buggy Material, Plantation and Household Supplies, Table and Pocket Cutlery, Razors, Scissors, Glassware, Tinware, Lamps, Potware. Everything in the Hardware Line.
Stoves! Stoves! Stoves!
Fine Cookers for wood or coal. Low prices, best make, guaranteed. See us always before buying either a Cooker or a Heater. OIL STOVES from \$1.00 up. Ladies these are the very things for convenience! Try one.
Guns! Guns! Pistols!
Best make and cheap. Guns from \$2.25 to \$65.00. Pistols from \$1.00 up. SHELLS, CARTRIDGES, WADS, SHOT AND POWDER, Rubber and Leather Belting, best make, Packing in Hemp and Rubber. Gun Bristles and Twine.
HOLLOWWARE—POTWARE.
We are POWDER AGENTS and can sell dealers cheaper than they can order it. Save freight by buying of us.
Respectfully,
R. W. DURANT & SON.
Aug. 21

NOTHING SUCCEEDS LIKE SUCCESS.

Now is the time to buy your supply of PLOWS, TRACES, HAMES, SINGLE-TREES, CLEVICES, &c. And with a large and varied assortment to select from, you will find the above and everything pertaining to same at prices to suit everybody. We are agents for the following:
Studebaker Wagons and Road Carts, Buggies, Carriages, Surreys, White Pine Sashes, Doors, Blinds, Paints, Oils, Varnishes, Brushes, **DuPont's Gun Powder.** Joints, Caps, Fuse for Blasting Purposes. THE ATWOOD SUSPENDER.

The only Suspender in the world that can be adjusted to the form of all.

DON'T IT LOOK SENSIBLE? FOR SALE BY

Brown & Chandler, SUMTER, S. C. January 29.

Ducker & Bultman

1890.

WE PROPOSE to our many friends and customers during the present year to assist them, as heretofore, by endeavoring to sell straight goods, handle all lines, and still employ a full and competent corps of clerks. We can promise that each individual customer shall be pleased with their purchase of us and will come again. We have already saved the people of this county and city thousands of dollars in dispersing—still our present business—Dry Goods, Notions, Shoes, Blankets, Flannels, Shawls, Walking Jackets, Cloaks, Umbrellas, Oil Cloths, Hats, Trunks, Satchels, &c.
In saving them all that money, we make
