WEDNESDAY, FEBRUARY 5.

Okra. There seems to be a strong probability that the plant known as okra-(Abelmosches esculentus) will be made to furnish a valuable fiber. The plant grows wild all through the Southern which hanker for imported wines.

States, and has been known for years to farmers and stock men as capable of producing a very strong fiber, which in Texas and other localities is now used An Interesting Letter from Mrs. in making lariate. Ten years ago the Department of Agriculture had samples of the plant grown in its greenhouses, and a report was made on the quality of the fiber, but revived, and the Commissioner of Agri-

pods being used for thickening soup and to form a peculiar Southern dish called adapted to growing the plant, as the abandoned rice fields and undrained lands and is indigenous to Africa, where it suffering humanity to say, try the Electrogrows wild. It is abundant on the poise. White Nile and near the Victoria Nyanzi, and has long been naturalized in India, where it is cultivated for its edible pods. The fiber which has been produced abroad is described as long, silky and generally strong and pliant, rheumatism and general derangement of its breaking strain according to Roxburgh being 79 pounds dry and 95 only at the request of my wife. Improved in the Southern Presidency of India, it walked without pain or defliculty. I would is adapted for the manufacture of rope, ceived, and recommend its use to all similarly twine, sacking, and paper. It is used affected. to adulterated jute in Decca and Mymensing. In France the manufacture which is said to be equal to that made

from pure rags. inasmuch as the wood surrounds the fiber instead of being mixed withit, as in jute, and also that the work of preparation can be done by mechinery, the cost produced in countries where manual labecause no machine has been derised for separating the wood from the fiber. Vast quantities of jute are imported by making gunny cloth, cordage, shirting. coat linings, and it is extensively employed in mixing with silk, cotton, and woolen fabrics, and in paper making. It is believed that okra fiber can be substituted for jute in the coarser of these lines of manufacture, and some even Poise, \$25. claim that it will be found available wherever jute is now employed.

It is easily to be seen from this that if the okra fiber stands the test of further experiment, a new and most important industry will spring into being. The Agricultural Department at Washington states it has not yet been determined how the plant will bear cultivation and propagation, and the department is now grows luxuriantly in all parts of the in case the fiber comes into general use cans can be depended upon to devise machinery for preparing the fiber and ter-case

to make constant improvements upon it. | Secondly -As to its cost. To contract for ufacture of oil from cotton seed was commenced, but it has become a great any authority is granted for that purpose. industry. From September 1, 1883, to The act or the legislature authorizes the issue September 1, 1886 there were exported of \$12,000 of bonds, if so much be deemed from New York 88 871 barrels of this oil, and from New Orleans 186,720 bar- we would say that \$10,000 ought to be suffirels. The first recorded attempt to ex- circl. Should the Board get permission from tract the oil was made in Virginia in the proper authorities to erect the building 1826, and was successful, but it was not commercially experimented with until would thereby be avoided. Should we also 1834, when an attempt to manufacture be able to sell to advantage the old public it was made in Louisians, but did not school house and lot on Republican street, prove to be profitable. A second at besides, justice and fairness would seem to tempt and a second failure was made in require that some needed additions and re- granity good. 1847. During succeeding years new pairs be made to the school house for the and important improvements were made colored children. in the machinery for extracting the oil, annual interest on \$10 coe of boods at 6 per and in 1882 the business had become cent will be \$600. We now pay \$300 a year | Shoes, which we are offering at profitable. During previous years cot- as rent. The only increase will then be \$300 ton seed had been left to rot at the gins, per annum. To raise this sum will involve prices to suit every one. or, at best, only occasionally used as a as-much as the total assessment of property fertilizer. The oil is the most valuable in the city of Sumter is about one million two part of the seed, and is used for mixing handred and fifty thousand dollars. So that with lard, in soap making, dressing morocco, softening wool, as well as in year. The steady increase of property values pharmacy. The cake which is left after in the city will, of course, stend to lower this extracting the oil is fed to cattle, and rate. The principal of the bonds will not the meal, another element of the residue. is used to enrich the land, and it has ; been found that for food, and as a ferti- public schools, and who, it is hoped, will lizer, these component parts of the got- then be among the prominent business men ton seed are more serviceable than was and property horders of the city. the leading characteristics of a great in- full fee- value, and, if possible at a premium distry which has been built up during. We are personally as deeply interested as any the past few years by atilizing the once despised cotton seed, and it may not be site. We were elected at a public meeting of too much to expect, in view of these citizens (most of us being facts, that the okra weed may be made to discharge the responsible and onerous to furnish a fiber which will enter into a great viriety of manufactures, and thus fally navie the appainment of an advisory become still another élement in the di versification of American industries .- and see that no waste or extravagance may occur. Scientific American

It may be demonstrated that the jute trust of 1888 will prove a blessing in disguise. If the greed of the speculators had not been so great our farmers would have gone on using jute for years to come totally ignorant of to be considered as a permaneut substitute. Investigations and expect treat principle of the commence of the work from the ments are being made in other direct W helt tree, brogget to their ments. J. F. made suit to me, to grant him Letters of Adments are being made in other direct. W helt tree, brogget to their ments. tions. Hon. W. J. Northen, of Georgia, has discovered a strong fibre in the pea vine, and the Columbia Register claims that a still better Libre can be made from the sweet potate vine. It has already been proven that a good Sire can be cheaply made from the okra plant and cotton stalk. It is not unlikely that before two more years

we will have misis throughout the South

making bagging and coarse cloths from

en ettellemen and Buligion already been projected in Charleston for the manipulation of all kinds of fibrous plants by Dr. Panknin's system of decortication.

A California wine company has just received an order from Europe for 50,-600 gallons of wine. This will come back in due time nicely bottled and labeled, and will be paid for and drunk | Court House at 12 o'clock, M. with gusto by the cultivated tastes

THE ELECTROPOISE.

Chapin in Regard to the Wonderful Curative Powers of the Electropoise.

Cahleston, S. C., January 26, 1890. Mr. Anderson-Dear Sir: I was truly glad nothing seems to have come of it. Heto learn that an office had been opened in our
cently, however, the subject has been city for the sale of an instrument (the ElecBettie ropoise) about which I became-co enthusiastic a few months ago that I rashly went into culture of South Carolina, Mr. A. P. print (through the News and Courier) in an article describing its wonderful curative prop- at 2 P. M. new industry with vast possibilities is erties. I did not imagine the trouble I was about to be opened up. A specimen of bringing upon myself, for not a week has the fiber which has been received from to give further testimony and tell more about Mr. Butler through the department at it. in the enjoyment of perfect health my-Washington shows a long, strong, and self I can give no personal experience, but I Washington shows a long, strong, and have friends who, after suffering for years the glossy thread somewhat resembling most exeruciating pain, which the most skilhemp, though darker in co.or. The ful physicians North and South had failed to fruit which this okra plant produces is relieve, have been cured by the use of the prized as a vegetable, the mecilegicous' Electropoise. It is a panacea for nervousness, brain fatigue and general debility. It is elec-tricity applied at home, without current, shock or danger. I have many friends among gumbo. The Southern soil is especially the clergy who tell of the wonderful relief experleneed by ocuneeting themselves with the instrument, and lying down after a fatigating day's work. It only needs a trial to convince generally could be utilized for raising the most skeptical, and when I hear the testimast quantities of it. Chra is also a mony of the Hon. Wm. C. Sibley, of Augusta, native of the West Indies, notably the Rev. T. W. Moore, D. D., of Florida, and sarc. Cuba, where it grows in almost all soils, have been benefitted, I feel it a duty I owe

> President of the Woman's Christian Temperance Union of South Carolina. Here is what the Hon. Wm. C -Libley, of Augusta, has to say about the Electropoise: AUGUSTA, GA. Had suffered many years with sciatica. | Wedgefield

nerves and muscles; walked with great difficulty; had no taith in the Poise, and used it pounds wet. When well prepared, as efter two weeks use. At end of three months W. C. SIBLEY.

I went to Florida six years ago completly of paper from the fiber is patented, and broken down from a complication of bronhere it receives only mechanical treat- chitis, catarrb, cyspepsia, torpid liver, etc; received no benefit from climate, and had no ment and produces a paper called bends, hope of recovery. Four months home treatment with the Electropoise restored me to health, with a gain of forty pounds in weight. It is claimed for the okra fiber that, I can now preach two sermons a day without irritation of threat or bings. It is the remedy for everything in my family. REV. C N. MORROW.

.I was stricken with paralysis Four months' of production can be reduced to one cent medical treatment gave me no relief. Eleven me to return to my church work. I confidently recommend the use of the Electropoise bor is very cheap, as India and China, to suffering humanity. REV. T. C. STANLEY.

i had chronic diarhort nearly two years. Medicine had no effect on me. A short use of is returned. the United States, and it is used in the Electropoise caused a complete restoration to health, with a gain in weight.
