Their Think-Pans Lighter. It is not gallant to refer to it, perhaps, but the illustration is necessary. At birth an average female brain weighs 347 grammes, and the male brain 393. The female brain begins to lose weight after the age of thirty ; that of a man not till ten or fifteen years later. The Medical Record tells us that there s just five ounces less amount of brain matter standing between women and idiocy than

here is in the case of a man.
It is very evident from this that our wives. nothers and sisters need to have a care of themselves. When debility, depressed spirits, enervated sensations, loss of appetite and dyspepsia make their appearance in the home circle, the ladies should, by all means, have that universally accepted remedy, Dr. Westmorelands's Calisaya Tonic, to insure a return of health, vigor and spirits.
