The Edatchman and Southron. WEDNESDAY, MARCH 31, 1897.

DISEASES OF TRADES.

RESULTS OF CONTINUED OCCUPA-TION OF MEN WHO WORK.

It Appears That Each Kind of Employment Has Its Peculiar Ailment-Both Physical and Mental Workers Fall Under the Rule-Politicians Die Early.

It is well known that there are a number of dangerous trades which give rise to serious diseases; but, as a matter of fact, almost every occupation has some ailment peculiar to itself. A doctor can always tell if his patient is a baker, for instance, by the state of his teeth. The flour dust collects on the teeth, becomes acid and gives rise to a special kind of decay. Bakers, owing to their irregular life, sleeping in the day and working at night, and because of the hot air and dust, are great victims to consumption. Blacksmiths, strong as they are, very often suffer from paralysis of the whole right side from the continuous shock of hammering, and their eyes become weak from the glare of the fire. Athletes, strange to say, do not, as a rale, enjoy long life. Professional boxers, wrestlers, gymnasts, cyclists, are short Lved and suffer from enlargement of the heart and diseases of the lungs. Foilermakers get deaf from the continnal loud noise. Brewers and brewers' drivers drink beer in such large quantities that they ruin their livers and genenally die young. Bricklayers and plas-terers are very healthy, and they are said to resemble asses in never dying. Butchers are very strong and healthy, but they suffer in health through eating little pieces of raw meat. Cabmen are noted for "nipping," and they endure the natural consequences. The cold also

CURE sold only by the natural consequences. The cold also affects their faces to such a degree that the muscles of the face become frequently paralyzed.

Carpenters and cabinet makers are afflicted with varicose veins in the legs, and the action of the shoulder in sawing and planing produces a diseased condition of the large artery that runs from the heart to the arm, so that there is not a carpenter living, a doctor says, in whom a curious noise may not be heard ty applying the ear to that blood vessel Hardly a single china scourer lives to old age without becoming asthmatic. Clergyman's sore throat is of course well known. It is said by some to result from having the month open so frequently, the air going in that way and drying the throat. Others say it is caused by the clerical collar. And others still say it results from the fact that the clergyman preaches from a pulpit and has to bend his head downward-for barristers, who talk quite as much, de on the same level as their hearers.

Miners, from working in the dark become very irritable. Their eyes ge weak, and their lungs become quit black-miners' lung. Cooks, particular ly male cooks working in hotels, club and restaurants, get gout from contin nally tasting rich food, and both mal and female cooks get varicose veins and flat feet from long standing as well as the well known ache of the face from the heat and dirt. Coopers have a lump on the knee, which is really a little bag of fluid put there by nature to protect the knee from the injurious effects of pressing it against the barrel. Divers' hearts become distended from holding their breath.

Domestic servants are remarkable for suffering from typhcid fever. Housemaids are frequently afflicted with poverty of blood from drinking tea and running up stairs. Dressmakers' long boars and confinement result in consumption very often, but more often in indigestion, poverty of blood and impaired eyesight. The fumes of nitric acid make goldsmiths' eyes sore, and they get cramps in their fingers from catching small screws. Nearly all the human beings who suffer from that awful disease, glanders, are grooms.

India rubber workers have very bad headaches and great mental depression. Painters are poisoned by the lead they use so much, and all their muscles, but especially their wrist muscles, become very weak. Photographers get poisoned by cyanide of potassium. The dust that enters the lungs of potters when they are sifting clay interferes so much with their breathing that "potter's asthma" is a well known disease. Compositors get cracks and fissures in the lips and small tumors in their mouths from the habit of putting type in the mouth, and consumption attacks them frequently because of the stooping posture and the confined, sedentary life. Politicians are greatest sufferers of all, the constant dram drinking giving them indigestion, jaundice and nervous diseases, killing them at an earlier age than members of any other profession. Sailors, very singularly, suffer greatly from consumption, owing to the cold and damp and the bad air of the forecastle. Salesmen and saleswomen in shops do a lot of standing, which gives them varicose veins and pains in the feet. Cloth scourers, who inhale benzine and turpentine, suffer from headache, lassitude and nervousness. Shoemakers get their chest pressed in by the last, lose their appetite and strength and have headaches. Stonecutters' eyes are often injured by the flying stone.

Tea tasters, although they only take the tea into the mouth and do not swallow it, become so nervous that they can follow their employment for only a perind of eight to ten years. The sedentary life of lawyers, artists, students and literary men gives rise to gout, which is said to kill more wise men than fools; dyspepsia, which made Carlyle's life such a torture, and apoplexy, which carries off hosts of great men.-Pall Mall Gazette.

Not News.

"We heard some of the strangest, most outlandish things last night," be-

gan the woman who gossips. "Yes," replied the woman who doesn't, "so a friend who attended your musicale was telling me."-Exchange.

is a necessary and important The North, Northwest, South and ingredient of complete fertilizers. Crops of all kinds require a properly balanced manure. The best

Fertilizers

contain a high percentage of Potash.

All about Potash—the results of its use by actual ex-periment on the best farms in the United States—is told in a little book which we publish and will gladly mail free to any farmer in America who will write for it,
