How the Insurgents Have Killed Time and Gained Their End.

Manila, July 22, via San Francisco. Aug. 24 .- In Manila talk of the with weeks, but with months and nents. even years Among the mass of people here, military men and foropinion. The whole effort of the have been as successful as they ocald have hoped. Unless affairs take same unforeseen turn, the Filipi nos will resume the war this fall with fresh spirit and a replenished stock of arms and ammunition One ship load of arms, it is learned on good authority, has reached them within this week. Of money the leaders of the insurrection have no lack. They control the resources of a large and exceedingly rich country and even though no crops were harvested for several years they could still obtain enough cash and treasures of the church, the storehouses of farmers and manufacturers and funds of private individuals-a system of levy which they have long enforced to considerable success. All the ships coming and going into the ports recently opened to trade pay heavy tribute to the insurgents.

Much of the profits of this inform al sort of government are supposed Maj. Gen. To whip them while they are pursuing such tactics an army will be needed that can move rapidly and strike day after day, following up a victory without having to wait for rations and thus giving the enemy time to reorganize. To capture them, most of the generals here think, cavalry will be necessary. Time after time the Americans have carefully planned movements which seemed sure to result in the rounding up of two or three thousand rebels in a trap, but every time the difficulties of the country, the slowness of the wagon trains and the supplies by impressing to their use the superior sgility of the light moving natives have conspired against them and when these several divisions of the army came together they have found a handful of obsequious brown men who announced themselves "amigos."

McKinley, Root and Griggs Confer.

Plattsburg, N. Y., Aug 22-Secretary Root arrived from Washington on the noon train and soon after lunch joined the president and At torney General Griggs in the president's private office. They were closeted for nearly two hours, during which time they had a general talk on all pending matters.

Secretary Root, when seen by the Associated Press correspondent after the conference, said : "No, there is nothing startling to give out as a result of our conference. We had a general talk on a number of subjects, sion officials because I felt sure that but there is really nothing of special they knew the needs and could disinterest to give out at this time." Attorney General Griggs declined mistake " to talk on the subject of the conference.

Gen. Merritt had a short talk tonight with Secretary Root after the latter's conference with President McKinley and Attorney General Griggs.

Cost of the Constabulary.

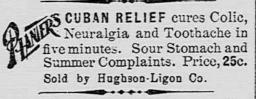

A recent comparative statement compiled by Mr. W. W Harris, constabulary clerk, shows that the 34 dispensary constables now employed by the State are accomplishing as much as the 59 who drew salaries uptil about the middle of June.

The decrease in cost to the State has been \$1,797 34 since the constabulary was reduced, these figures being the difference between the expense accounts of May, \$4,493 69, and of July, \$2,696 35. In June the month the cost to the State was \$3,561.19. The total saving for a year at this rate will be \$21,658.80, based upon the difference between May and July. This is an average of \$59 a day.

It is Time to Plant Bulbs.

This is the season of the year in which to set out bulbs. Prepare the ground for them before they are re ceived by having it dug up to a depth of at least a foot-a foot and a half is better-and worked over until it is meilow," writes Eben E. Rezford in the September Ladies' Home Journal. "Mix with it a liberal quantity of old, rotten manure from the cowyard, or, if this is not obtainable, use bonemeal in the proportions of one pound to a equare yard of soil. If the soil is naturally heavy, it is well to add considerable sand to make it lighter and more porcus. Plant the buibs as soon as possible after they are received, as they are greatly injured by exposure to the air. Set talips and byaciaths six inches deep, smaller bulbs from four to five inches. All bulbs should be placed five or six icches apart, and each kind kept by itself."

John D. Rockefeller in recently declining to aid personally in raising the debt of a western church said to the applicant : "I cannot oblige you because I have had no opportunity to examine a report of your financial condition and I never contribute under any other circomstances You had best apply to the mission people for assistance. Last year I con tributed \$1,000,000 through the mistribute it wisely. I might make a
