# THE WATCHMAN AND SOUTHRON, NOVEMBER 6, 1901.

# The Watchman and Southron. WEDNESDAY, NOVEMBER 6, 1901.

The Sumter Watenman was tounde in 1850 and the True Southron in 1866 The Watchman and Southron now has the combined circulation and influence of both of the old papers, and is manifestly the best advertising medium in Samter.

## TAMMANY HALL DEFEATED.

Seth Low Elected by Thirty Odd Thousand Majority.

New York, Nov. 5. -Seth Low, form-er president of Columbia university and four years ago the Citizens-Union candidate for the first mayor of Great-er New Yrok, was elected today the second mayor of Greater New York, by a plurality ranging anywhere from 30,000 to 40,000 defeating Edward M. Shepard of Brooklyn, the Democratic nominee. The campaign was an exciting one, and the vote though somewhat less than the presidential elec-tion a year ago, was the largest ever polled in a municipal contest in this

country. In addition to the canvass for mayor In addition to the canvass for mayor public interest centered in the nomi-nation by the Fusionists of Wm. Travers Jerome for district attorney, and Mayor Robert A. Van Wyck, by the Democrats, for justice of the su-preme court were voted for only in the preme court, were voted for only in the preme court, were voted for only in the territory contained in New York county. Returns received up to 11 p. m., indicate that Jerome had been elected by a comfortable plurality and that Mayor Van Wyck had been de-feated, the latter running behind his ticket from 15 000 to 20 000 ticket from 15,000 to 20,000.

Returns also indicate the complete triumph of the Greater New York Fusion ticket, Charles Vincent Fornes, the nominee of the Citizens-Union and the Republicans for president of the board of aldermen, defeating George M. Van Hoesen, the Democratic nominee.

E. M. Grout, for the past four years nominee for comptroller, has also de-feated W. W. Ladd, Jr., Democrat.

Election day broke cold and cheerless. A drizzling rain was falling and a chill wind swept the streets and the early vote was seriously affected. In many of the up-town polling places there were no voters on hand when the boxes were opened at 6 o'clock, and at others little groups that had gathered earlier sought shelter from the chilling rain. In more densely popu-lated districts there were crowds at the polls and at the 19th election district in the Sixth Assembly district, of which State Senator Timothy J. Sullivan is Democratic leader, 160 men voted in the first 43 minutes.

five nolicemen were on Seventyman Dick of the Republican State headquarters said good night to the crowd after issuing the following:

33 members of the senate and 70 to 80 of the 110 members of the houes.

"Chas. Dick." (Signed) The Republican plurality exceeds the average of 53,000 for the last 10 years, or since the first election of considered one of the features of the campaign. The Democrats were the chief losers in this shortage.

### Completely Vindicated.

Men who a few years ago were ridi-culed and jeered at for demanding an increase of the ciculating medium can take some comfort in the fact that time has brought a complete vindication to them and the wisdom of their claim. Men who claimed to have a corner on all the financial wisdom there was lying around loose dismiss-ed the matter with a wave of the hand and called them financial ignoramuses who did not know the first principles of finance, and under the specious guise of "sound money" classed the plain farmers of the country who called for an increase of the circulat-ing medium as financial idiots who didn't know what they did want and claimed that the country had plenty of money in circulation. They were of money in circulation. They were called "repudiators" and other simi-lar offensive epithets. But they have been vindicated. For some years now the volume of money has been stead-ily increasing and the treasury report issued over a week ago shows an increase of \$29,400,000 for the month of September past and for the year be-ginning on the 1st of October last the increase foots up over \$113,400,000 and the per capita circulation is now \$28.25 against about \$23 a few years ago. These same men are now "point-ing with pride" to the prosperity of the country as if it were a vindication of their financial wisdom when it is in fact just the reverse. The enormous increase in the world's stock of gold in the last few years has added im-mensely to our volume of circulation and has cheapened money, the very thing that the "sound money," Solo-mons said we did not want and they held up their hands in horror at the idea of "cheap money." Every farmer in the country knows how the alliance was ridiculed for wanting more money and they know that it is a matter of record what these financial Solomons said about them. And the thing is here. It is impossible to speculate what would have been the consequence what would have been the consequence had the claim of these men that there was money enough in the country been held to with our growing popula-tion and expanding commerce. Finan-cial distress of the most direful sort

would have been almost certain.-An-

New York, Nov. 4.-At midnight tonight, six hours before the opening of the polls, both sides in the municiyears, or since the first election of pal contest were claiming the victory. McKinley as governor, which has been The most strenous talk came from the McKinley as governor, which has been termed the greatest Republican era in Ohio. The total vote this year will not reach 90,000 and the shortage so not reach 90,000 and the features of the tribution of campaign funds in the baying hurried to their afternoon, having hurried to their several precincts to give their last or-ders to their followers. John A. Mason, of the Shepard headquarters, said he felt confident of the result and placed the Democratic candidate's majority at 40,000.

During the late afternoon, Seth Low, the fusion candidate at his own headquarters, said: "I think things could not look more rosy," and added. "This has been a most intelligent campaign. The fright is now over and no matter who is elected, I am sure that the city will profit by it." Robt. C. Morris, chairman of the Republican campaign committee, stuck to his estimate of 70,000 for Mr. LOW

Mr. Shepard believes that he has no particular statement to make, noth-ing to say of the campaign beyond what he had already said and no issues to discuss further that he had already discussed them.

If the betting on the result is any indication as to what the count of ballots will show the Fusion candi-dates seem to have the better of it by a share. Late tonight wagers were laid at 10 to 7 on Low and the rest of the city ticket. There is not the same confidence on the Fusion side as to the county ticket and predictions are made that all the candidates on the Democratic county ticket in New York county will be elected with the possi-ble exception of Robt. A. Van Wyck for justice of the supreme court, who has had to bear the supreme court, who has had to bear the brunt of the at-tack, and Henry W. Unger for dis-trict attorney. Possibly on account of the whirlwind campaign he has made, Wm. Travers Jerome, Fusion candi-date for this latter office, was getting the beacht of predictions that he the benefit of predictions that he would run ahead of his ticket, but the betting odds favored Mr. Unger.

### What Fruit Trees to Plant.

Although the following article was published in The Journal of February 5th of this year, it is republished in answer to the many inquiries which

are received upon the subject. Numerous inquiries come from al-Numerous inquiries come from al-most every section of the south as to what varieties of fruits are the most desirable there, and these questions while today. Nov. 3.—The annual report of Second Assistant Postmaster General Wm. S. Shallenberger, made desirable there, and these questions desirable there, and these questions public today, urges regular direct fast being usually propounded from persons mail service between the Pacific coast desiring to plant only a limited number and the orient, the reestablishment of payable from Oct. 15th, 1901, to Feb. 1st, of varieties, it is therefore difficult to pneumatic tube service generally and 1902. give a list that would suit every locality the closer separation of city mail by as well as soil and other conditions which must be considered. These considerations must be based in a great measure upon the ultimate use certain fruits are expected to be applied to, whether for a regular family supply, home market, drying or stock feeding. For the past 25 years the Georgia State Horticultural society has during it annual sessions carefully revised the lists of the various classes of fruits which can be cultivated in Georiga (and this applies also to South Carolina and Alabama as possessing a simi-lar climate) dividing the State in four has been a slow go. Then he waded into McLaurin, the apostle of "Com-mercial Democracy." This apsotle these regions. While this gives a reliable guide as to the most desirable varieties, still local conditions of soil, situation, elevation and surroundings must be taken in consideration and these must consequently be left to the its mails, might go to the steamship prospective planter who should become familar with details of which he should be the best judge. We must therefore refer our friends to the annual reports of the State Horticultural counties, all advices indicating Demo- if he does as well everywhere as he rious fruits to the four distinct regions After having selected a sufficient number of varieties of a class of fruits gards the tariff as the greatest of the which are known to succeed in the regions wherein they are to be plant-Laurin advocates high tariff, and, of ed, the next object is to consider the course, trusts. The Republicans want number of trees of each class and variety. If solely required for family supply, one or two trees of a kind would suffice, providing their maturity ranges from earliest to latest. If more fruit is required for the purpose of disposing of it in home market, or for drying, canning or feeding to stock, then a selection suitable for these ends must govern. Every market has its peculiar needs and these are always to be consulted. Again there are locally successful and this may induce its more or less extensive cultivation, but if this particular variety is unknown in market it would be unwise to attempt its culture upon a large scale until one is satisfied that a relatively large demand would follow. There are, however, a few varieties men, was thoroughly in accord with of apples, pears, peaches, plums, the speakers. Mr. Henderson, in his grapes and some of the small fruits The greatest Republican gains are the speakers. Mr. Henderson, in his grapes and some of the small fruits speech, declared that there are only that are popular in every market and seem to thrive well in almost every section of the south. There is consequently little risk connected in cultivating these. A family fruit orchard is altogether a different thing from a market orchard. For the former the principal object in view is the quantity of the fruit. Size and attractive appearance need not here form as much of a consideration was here selecting for market requirements, when both size, color and carrying capacity should The greatest Republican demonstra- there were evidenly grave internal in- of certain types as the Chinese, lemon to answer the complaint in this action, carried lates county and that the leg-islative ticket there is elected. postal clerks on railway train rather than by clerks of the mailing division after its arrival in the general post-office. Under the last named proposition the entire force engaged in distribut-ing the mail ready for the carriers would be under one management and congestion in a postoffice could be overcome by the temporary detail of railway mail elerks off duty. The postoffice department has no contract for direct mail service between the Pacific coast and the Philippines, mails being carried by government transorts or by steamers to Hongkong and thence by steamers of other coun-tries to Manila. "It now seems probable," says the report, "that if this government should withdraw its transports as may be done at any time, with the understanding that its passenger and fast freight traffic, together with the increasing volume of company that would submit the most satisfactory proposal for quick and regular service, a favorable contract couldbe secured. The mail service and commercial interests would be greatly advanced by fast mail steamers adhering strictly to schedule time between the Pacific coast and Manila, and calling at other ports at regular intervals, under conract with this government." The request for \$500,000 appropria-tion for pneumataic service is renew-The report shows that on June 30 last, there were 267,357 miles of star route service, 183,358 of railroad routes, 45,-779 of railway postoffice car routes and almost 3,000 miles of electric and cable car routes. The annual rate of expenditure for all classes of domestic mail transportation service has inreas-ed \$6,940,285 since last year. It is contemplated that the new contracts for star mail service beginning next July shall provide for delivering mail into boxes along nearly all of the routes. The practice of granting to contractors general permission to sublet their star route service has been discontinued. There were 825 casualties in the railway mail last year.
