# GREAT FOREST FIRE IN WEST. HEYWARD TO DEMOCRATIC VOTERS.

# Forest Fires and the Flames are Unchecked.

Kalma, Wash. Sept. 14.—News reached here late last night that the To the Democratic Voters of South forest fires on Lewis river have wrought sad havoc. D. L. Wallace, his wife and two children were burned to death. They were camping in the woods when caught by the fire. Their wagon was found burned up, the charred bodies lying near. A 12-year old boy of Mr. Manley's is also dead. Mrs. John Polly, her baby and a brother, name unknown, and Mr. Newhouse and Mrs. Graves are dead. Fifteen others were found without clothing excepting our State. With appreciation far too gunnisacks. Logging camps are burned out completely. The fire has spread from Lewis river north to the Kalma river, and 50 sections of the finest timber on the coast have been destroyed. It is impossible to give an estimate of the damage done to property. Oak Point, 20 miles below here, on the Columbia river has been destroyed. There are no reports of lives lost, but loss to property is estimated at about \$300,000.

Coventan, in the northern part of the county. Everything in its path has been consumed. The air is black with been consumed. The air is black with smoke and falling ashes. Three lumber camps are reported, missing; people are panic stricken and crazed over the loss of property. Cowlitz county thought it was going to escape until today when the reports came thick and today when the reports came thick and today when the last. Five the loss of property. Cowlitz county thought it was going to escape until today when the reports came thick and fast, each worse than the last. Five people are dead and two missing, with only partial reports from the burned district. A courier has just arrived from Lewis river stating that only two houses are left standing on Lewis river and that not less than 50 persons have perished.

### An Important Discovery.

as it is probable, or, rather, more than probable, we believe, that a greater number of human beings perish as the result of such disorders, than from all others combined. In three months last year, the Sun notes, 546 children died from this cause in Baltimore, while only a third as many persons, of all ages, died from consumption, and the Baltimore rate is not an exceptional one. The same fatailty marks

the disease in all cities and towns. The story of the discovery is interesting. John D. Rockefeller's grief over the loss of a favorite grandchild two years ago is in part responsible for it. Immediately following the child's death Mr. Rockefeller set aside \$200,000 for a thorough research into causes of diseases, among them that which proves fatal to so many children and commonly known as "summer complaint." Dr. William H. Welch, the distinguished pathologist of Baltimore, was selected as the head of the Rockefeller Institute of Medical Research, and its work has been conducted systematically under his supervision. The investigation which resulted in the isolation of the germ of infantile diarrhoea was a part of the research work of the Institute and was conducted in the laboratory of the Thomas Wilson Sanitarium for Children, near Baltimore, by Messrs. Charles Duval, of Annapolis, Md., a student at the University of Pennsylvaina Medical School, and Victor H. Bassett, of Aledo, Ill, a student of the Johns Hopkins Medical School and pathologist to the Sanitarium. To Mr. Duval is due the credit of isolating the specific germ in the first case successfully examined. The organism is "identical with that which causes acute dysentery in adults." Out of fifty cases the specific organism seriously injured. No cause for was found in 42. It was observed that the blood of the patient had the prop-erty of "chimping" the germ isolated, just as blood serum in typhoid acts on the typhoidbacillus, and this was a great help in identifying the germ, as the dead here this evening while out walkblood of the patient affected no other ing. organism in a similar manner. The cases investigated represented all varities of the summer diarrhoea of in- terday. In Saxony the temperature fants, except cholera infantum, of sank to zero and a hurricane-like wind York State Republicans today and at from all threats and acts calculated to tarium, and in all cases the organism large number of people. The damage gave out as the chief result of the ployees, agents and officers of the railwhich there were no cases in the Sanifound to be present in the secretions is estimated at millions of marks. was the same as that which produces acute dysentery, in adults. Many persistent efforts have been made in this country and in Europe to find an organism which could be shown to be the cause of the disease. All these researches have failed to reveal any single causal germ, although many have been described by various investigators. Indeed, it was the opinion of many of the most prominent specialists in children's diseases that no one, but several, organisms were concerned in these maladies; that is, that they reped really different diseases.

is believed that the discovery will great value in attempts to check se infantile maladies because the ost intelligent efforts towards preention and cure of a disease can only be employed when its cause is known frost. Late crops thoughout the secand understood, as is illustrated in tions which escaped the first visitation suberculosis, yellow fever, typhoid of the cold were badly damaged. fever and other affections.

Dr. Welch is quoted as saying that the discovery will for the present at statistics show that exports of cotton least, be of especial benefit with regard for the 12 months ending Aug. 31, to "preventive measures" rather than were 6,715,793 bales, valued at | \$284, - He had committed suicide by shooting with a revolver. The Olympia is as the treatment of acute dysentery at \$317,816,329 for the 12 months ending has not been altogether successful. Aug. 31, 1901. "Preventive measures, on the other hand, have been signally efficacious among the soldiers in the Philippines, aluminum as a substitute for paper are known for his act. Lieut. Morris is funds which Capt. Carter and his relably he the area of the civil war and her substitute for paper are known for his act. Lieut. Morris is funds which Capt. Carter and his relably he the area of the civil war and her substitute for paper are known for his act. and the same will probably be the case in infantile diarrhoea." The results of the investigation, at any rate, it is four-thousandths of an inch in thickremarked, indicate that the germ ness, in which form it weighs less than enters the body with food and drink, which emphasizes the necessity, long machinery these sheets can be made insisted on by physicians of supplying even thinner and can be used for book Jones, who for many years was presibabies, especially among the poor in and writing paper. The election of Mr. Von Kolnitz to South Carolina.

### Fifty Persons Burned to Death in Governor-Elect Returns Thanks, President John Mitchell Says Minand Pledges Himself to Endeavor to Prove Worthy of Confidence.

Carolina:

It is with a sense of profound grati-tude, mingled with an equal sense of ty and town, from every precinct and hamlet, have I been remembered with trust and honor by my countrymen of deep for speech, and with thanks that come from my heart, I pledge you again, by our sacred traditions and glorous history, by all that we hold dear, to do all in my power to prove worthy of this great gift—the confidence and trust of South Carolinians.

D. C. Heyward. Walterboro, S. C., Sept. 13, 1902.

### Card From Col. Talbert.

head and sulk in my tent, nor com-plain at the result of this election. The people have spoken and I accept the result and support heartily the nominees of the party from Governor down. When my successful opponent Capt. Heyward, shall have taken his seat as Governor I stand ready to hold may his bends in any effort he may are corderly. They are begun, leaving 130,000, he explained, to be cared for. When asked if the troops are to be withdrawn from the region, Mr. Mitchell said:

"Not that I know of. There is no need of the troops, however, as the The Baltimore Sun states that it is able to announce with authority a discovery that ranks in importance with that of Dr. Koch's: finding and isolation of the tubercle bacillus, ten years ago. "It is the discovery of the organism responsible for intestinal disorders in infants, which fills many thousands of graves every summer." Thousands of graves every summer." Thousands of graves is indeed a moderate statement of the number, no criticisms whatever to make. I no criticisms whatever to make. I tried to conduct my campaign fairly, squarely and upon a high plane. I have tried to be honest, frank and honest on all questions that came be-fore us, and having worked to this end I have nothing to retract and nothing to apologize for, and can't see but what I would conduct it just the same if I had it to do over again. But there's no time to look backward. The people of the State have rendered their decision, and I, being a loyal and true Democrat, am willing to mine now and there is no chance of abide thereby and will say, in conclusion, let us stand behind Capt. Heyward and help him to be one of the best Governors South Carolina has ever had, and let us be as one man in our efforts to make the old Palmetto State second to none in the Union.

# END OF STRIKE NOT NEAR.

### ers Will Not Return to Work **Upon Promises that There** Will Be Arbitration Afterwards.

Indianapolis, Ind., Sept. 15.—In an interview over the long distance telephone with The News today, John Mitchell, at Wilkesbarre, said:

"I can't predict when the anthracite strike will be settled. If anything is being done toward a settlement by the other side, I don't know it.

"Nothing towards a settlement was accomplished at the Harrisburg con-ference between Gov. Stone of Penn-sylvania, the presidents of the three anthracite districts, myself and others who have been trying to end the strike.
We simply met and discussed the causes and progress of the strike."
"Did Gov. Stone represent J. Pierpont Morgan or any of the anthracite presidents?"

"I did not understand that he was representing any one but himself. There is no foundation for the report that the men are to return to work on a promise that the operators will make concessions and arbitrate afterward. Mr. Editor: Please allow me just a The miners would not return to work little space in your columns for a short | under such an arrangement."

to relieve the distress in the region. About 25,000 miners have left the region since the strike began, leaving

### Miners Killed in Virginia.

Roanoke, Va., Sept. 15.—A special from North Fork, W. Va., to The Roanoke Times says:

A disastrous gas and power explo-sion occurred in the Big Four mine of the Algoma Coal and Coke company here this morning about 8 o'clock. James Lester, an engineer, John mine now, and there is no chance of their being recovered alive as they are beyond the point where the explosion occurred and the gas and smoke is so thick that the rescuing parties are being driven back. H. F. Frankenfield, the mine boss, and George Gaspie, a Hungarian miner, succeeded in crawling over the fallen coal and slate to the lights of the rescuing party and have been taken out alive, although they are both badly burned and nearly suffocated by the gas and smoke inhaled.

### When Reptiles Ruled a World.

least doubt."

There was a time "in the wide revolving shades of centuries past" when our globe was wholly in the possession divided naturally into three great classes. In the oceans they became gigantic paddling enaliosaurians; on dry land, or, rather, wet land, for the whole face of the globe was doubtless a quagmire at that time, they became monstrous, erect dinosaurians, some of which had legs fifteen feet or more in length; those which inhabited the regions of the air were the terrible flying

For a vast but unknown length of time these awful creatures literally ruled the earth. Finally after they had "seen their day" they began to grow less and less. One by one they died out in the face of the younger and more vigorous fauna until at the present time only a few miniature alligators and crocodiles and a few toy snakes remain as reminders of skulking lizards and geckos and of the enormous reptilian types that once crowded land

### Simple Indeed.

It seems as if the acme of frugality had been reached by a French officer who explained with many appropriate gestures his system of sustaining life on a pension of five francs a week.

"It is simple, veree, veree simple," he said to the friend who had expressed amazement at his feat. "Sunday I go to ze house of a good friend and zere I dine so extraordinaire and eat so veree much zat I need no more

till Vednesday. "On zat day I have at my restaurant one large, veree large, dish of tripe and some onion. I abhor ze tripe -yes, and ze onion also-and togezzer zey make me so seek as I have no more any appetite till Sunday. You see, it

is veree simple." Books With Leaves Uncut. A book the leaves of which are uncut possesses no value of an intrinsic character beyond one that is cut, but really less. For that matter, if it is to remain uncut, it is as valueless as it is useless. There are book collectors, however, who place a premium upon books with uncut leaves and so commend them in their advertisements and circulars. There are persons who load certain shelves in their libraries with uncut books. Of course they are not for use and are not used and are

# Brougham and Mulled Port.

valueless except for keeping.

Lord Brougham, who as a member of the house of commons was a most abstemious man, upon his promotion to the pecrage acquired less commendable habits. During his long and impassioned appeal to the lords to refrain from rejecting the reform bill of 1832 "five tumblers of mulled port, with a dash of brandy, were brought to him at intervals." When he came to his last sentence ("I warn you, I implore you-yea, on my bended knee I supplicate you-reject not this bill") he knelt on the woolsack, whence he slipped to the floor. It is recorded in the "Lives of the Lord Chancellors" that "he remained some time as if in prayer, but his friends, alarmed lest he should be suffering from the effects of mulled port, picked him up and placed him safely on the woolsack."

# Attar of Roses.

In trade the rose is very valuable, as the attars of India and Persia sell at a very high price, and there are large months being March and April. In Turkey also rose farming is largely carried on, and a very fine attar is got from the rose grown in Kashmir. Even rosewater is a luxury which is by no means to be despised as to price, but the attar of roses is immensely costly, and it takes an enormous num-

The attar is said to have been first discovered by the favorite wife of Jehan Jeer, through whose garden ran a canal of rosewater, on the surface of which the begum found a few drops of the precious attar or oil floating.
