

GERMANY'S BUILDING AT THE WORLD'S FAIR.

A Reproduction of Old Castle Built by Frederick I, of Prussia.

The plans for the German National Pavilion at the World's Fair, St. Louis, have been completed and submitted to the Director of Works, Isaac S. Taylor, for approval. It has been the endeavor of the German Government to keep the architecture of the building in harmony with the Exposition buildings in the immediate vicinity. The pavilion will be a fairly accurate reproduction of the central portion of the royal castle at Charlottenburg, near Berlin. This old castle occupies a conspicuous place in the history of German architecture. It was built about the end of the 17th century for and under the direction of Frederick I, first king of Prussia. The castle was designed by Andreas Schlüter, the greatest German architect of that period.

The architecture of the Charlottenburg Castle is imposing. The main facade is in two stories, crowned by an enormous stilted dome. The facade of the first floor is in rustic stone. The second floor is ornamented with engaged Corinthian columns. In the center of the facade is a projecting bay crowned by a beautiful classic pediment. The drum of the dome, which is also surrounded by a Corinthian engaged colonnade, is higher than one of the stories of the building. The curve of the dome is broken by six bull's eye windows and is crowned by a towering lantern surmounted by a sculptured figure. In the pavilion the ground floor will be used for reading, writing office and reception purposes. The second floor has been set aside for purposes of representation. It will embrace an actual reproduction of the state rooms of the Castle of Charlottenburg. These rooms will be fitted up with precious old furniture, Goelins, and silver ornaments, the products of bygone days. In a separate building but connected with it will be a restaurant and a "Kneipstude," a combination of smoking room, drinking room, restaurant and fraternal society lodge room. This subsidiary building will harmonize completely with the architecture of the main structure and will be connected with it by an alley.

CALLED KING "A DUFFER."

Lord Salisbury's Absentmindedness Has Queer Manifestation.

A London cablegram to The New York Sun says: Many stories have been told about Lord Salisbury's absent-mindedness and strange mistakes in identifying well known persons combined with a supreme indifference for all with whom he finds himself in company. The latest of these stories which has gone the rounds this week tells of an incident which occurred at the King's levee on Monday.

Lord Salisbury was present and was standing, apparently wrapped in thought, among a crowd of distinguished men, when the bishop of London approached and greeted him. To the surprise and chagrin of the latter Lord Salisbury failed utterly to recognize him and the bishop was forced to explain who he was and to recall to the former Prime Minister the fact that he had appointed him bishop of London in 1901.

Later, on, when the bishop was conversing with the King, he expressed regret that Lord Salisbury was apparently unable to recognize his friends, and told what had happened. The King laughed heartily and said: "He has treated me worse than that. Not long ago, while having an audience with me, he gave a beautiful example of thinking aloud. On a table close to his lordship stood a photograph of myself. Lord Salisbury, taking it up, gazed at it for a few moments and then remarked, 'Poor old duffer; I wonder if he is as stupid as he looks.'"

Hon. Henry St. George Tucker, of Lexington, Va., has been elected dean of the school of law, jurisprudence and diplomacy of the Columbian University in Washington.

It was until the autumn of 1870 that the first diamond was found on the present site of Kimberley, says a writer in the Cosmopolitan. There was a shallow, circular depression, known as Dutoitspan, on the edge of which a farmer named Van Wyk lived in a cabin plastered with mud. This hut had no architectural pretensions, but, in its way, it went beyond the luxury of Fifth avenue, for the mud with which it was daubed was sprinkled with diamonds. One day Van Wyk's children prospected the plastering of their home and extracted several gems. The farmer and his friends began digging at the spot from which the mud had been taken and found more diamonds. Miners swarmed in, and a new camp, called Dorstfontein, sprang up. In June, of the next year, the Kimberley mine proper—one of the four great deposits that form the present Kimberley group—yielded its first diamond.

Paper gloves and stockings are now being manufactured in Europe. As to the manner in which the former is made little is known, but the stockings have been carefully examined by experts, and they are loud in their praise of them. It is claimed that they will last almost as long as ordinary stockings. The reason, they point out, is because the paper of which they are made, was during the process of manufacture transformed into a substance closely resembling wool, and was then woven and otherwise treated as ordinary wool.

Bennettsville, May 26.—The novelty works of W. P. Breeden, Jr., on the edge of the town were totally destroyed by fire last night. The loss is \$6,000, with no insurance. Sparks, driven by a strong, south wind, threatened the town, but a spread was finally prevented.

The Masons of Florence at an early day will erect a temple to cost \$10,000. The lot has already been purchased and arrangements perfected. The Presbyterian Church of Florence will erect a new church building at a cost of \$5,000.

THE BIRMINGHAM ROBBERY.

Two Young Men Arrested, and it is Said a Third Arrest will be Made.

Birmingham, Ala., May 27.—City detectives claim to have unravelled the mystery of the \$7,000 robbery of the union depot ticket office in this city, which occurred on May 16. As a result two young men, one of them being the son of J. M. Bibb, superintendent of bridges and buildings of the Louisville and Nashville Railroad, have been arrested and are now in jail. No one will be allowed to see them and not even the name of the second man arrested can be ascertained. It is claimed that the robbery was accomplished by boring a hole through the ceiling over the ticket office from a vacant room on the second floor of the union depot and through this hole the robbers looked through a magnifying glass and watched the employees of the office work the safe combination. It is said that on the night of the robbery they entered the office while the night ticket seller was asleep and worked the safe combination. The detectives expect to recover all the money and also to make a third arrest.

REGANTS FROM FREE SILVER.

Dr. E. Benjamin Andrews no Longer Believes in the Heresy.

Lincoln, Neb., May 26.—Free silver has lost an advocate in the person of Dr. E. Benjamin Andrews. The Chancellor of the University of Nebraska, in an address before the class in ethics, the largest in the university, practically announced that he no longer entertained the views he had once held concerning silver coinage. This change in views had been gradual in development, but it was now fixed and definite.

In company with many others a few years back Chancellor Andrews said he had been misled by the arguments of public men, and particularly by a celebrated geologist of Europe, who had, after much study and investigation, announced that the supply of gold was being exhausted and the world's mines would soon cease to yield a sufficient quantity of that metal.

This made it necessary that there be another standard of value. Time had proved the prophecy of the geologist to be false. Instead of lessening, said the chancellor, the output of gold had greatly increased and the supply now seemed inexhaustible, and as a result prices of commodities, instead of going to a lower level, had constantly appreciated.

Chancellor Andrews did not enter into the political phase of the question. Since coming to Nebraska he has been conservative in all his utterances in connection with his former hobby, nor was undue stress given to his apparent conversion in his address.

Four Sudden Deaths.

Edgefield, May 27.—The sad intelligence reached here today that Mr. Davis D. Padgett, county supervisor of Edgefield, dropped dead in a store in the city of Augusta at 8 o'clock this morning. Fatty degeneration of the heart was the immediate cause of his death.

Donalds, May 26.—Ed Gordon, a young man 18 years old and son of James Gordon, a prominent farmer of this section, died very suddenly yesterday evening. He was apparently in perfect health until he fell in the yard and in a few moments was dead.

Dr. Jno. A. Robinson, a prominent physician of Little River, this county, died of apoplexy this morning. Dr. Robinson was sitting at a table writing when he fell from his chair dead. News has just reached here of another sudden death. Mr. Wm. Taylor of Antreville dropped dead yesterday evening. His death is attributed to heart failure.

Here is a pointed paragraph from the Philadelphia Record:

"There is a weird hint that the daily newspapers of Philadelphia, Pittsburg and other cities will make no report of the Machine State Convention at Harrisburg next week. In the absence of busy special correspondents there would be no reports of the speeches of the Machine leaders landing themselves and each other and expressing approval of Gov. Pennypacker's apology for the muzzler. The convention would thus be consigned to Cimmerian gloom. As the nominations of the convention are already slated, including that of William P. Snyder, one of the muzzlers, for Auditor General, the omission of any reports of its proceedings would be no loss to the public."

The suggestion is worth consideration. It would hurt politicians a great deal more for the purposes to ignore them entirely than to cartoon and "libel" them.

Washington, May 27.—The American men of war will go to Kiel for regatta week by order of the president as a special mark of friendship to the German emperor and in appreciation of the many courtesies he recently has shown the American people.

Denver, Col., May 27.—A special to the Post from Newcastle, Wyoming, says: "W. C. Clifton, murderer of Mr. and Mrs. John W. Church, was lynched by a mob from Gillette last night. The mob battered down the jail door, holding up the sheriff and deputy the while, and hung Clifton to a bridge west of the town. Clifton's head was cut off by the fall of forty feet."

Poictiers, France, May 27.—Marcel Renault, the well-known racer and maker of automobiles, who was injured by the overturning of his machine during the first stage of the Paris-Madrid race, died shortly after midnight at Couhe Verac. Renault never recovered full consciousness from the time he was found stretched out beside the road.

Paul Blouet (Max O'Rell) died Sunday night in Paris from the effects of an operation performed last year for appendicitis.

Savannah, Ga., May 26.—At Rincon, eighteen miles from Savannah, today, Dr. M. C. Wilson was shot and fatally wounded by Benjamin Davis, who is 80 years old. Trouble has existed between the two men for some time.

IMMIGRANT AGENTS

Must Pay \$500 if They do Business in the City of Anderson.

The city council held a special meeting yesterday afternoon and passed an ordinance imposing a license of \$500 on immigrant agents doing business in this city.

There is already a State law requiring a license tax of \$500 from immigrant agents hiring laborers to go outside the State, but this ordinance seeks to place the same tax on agents employing laborers to leave Anderson and go to other points within the State.

The occasion for the adoption of the ordinance was the presence of an immigrant agent in the city who has been employing laborers to go to York county to work on a big dam being constructed on the Catawba river. Then man carried off about 40 negroes yesterday, many of whom were under contract to work for Anderson people and many of whom were owing money here. The agent said he was coming back and the city council has undertaken to keep him from doing so.—Anderson Mail, May 26.

KILLED LION WITH TEETH.

Desperate Encounter of a Hunter in Wyoming.

Landen, Wyoming, May 25.—All records of hand to hand encounters with wild beasts have been smashed by Anson Sercoff, of Torrey creek canyon, who bested a mountain lion a few days ago. Sercoff was prospecting when he ran across the lion's den. Determined to secure the kittens he dug a way into the den. At that instant the mother lioness sprang upon him and a struggle ensued.

The lioness overestimated its leap and did not secure a good hold, and Sercoff was enabled to twist about and face the animal. With one hand he grasped its lower jaw in such a manner that it could not use its teeth, and with the other managed to cross its forefeet and hold them against his body, so that her claws could not be brought into action. Lioness and man rolled over together, and Sercoff worked his body in between the beast's hind legs. In this position the lioness was able to do very little with her claws.

Sercoff buried his teeth in the beast's neck and tore frantically at the flesh until he had severed the jugular vein. The lioness soon became weak and died from loss of blood. Sercoff weighs only 120 pounds.

WRECK NEAR BIRMINGHAM, ALA.

Eight Men Killed, a Number Hurt and Two Trains Burned.

Birmingham, Ala., May 27.—A double-header, eastbound freight, and a westbound freight on the Southern Railway, collided this morning at Bryan, twenty-two miles west of here, with the result that both trains were burned and eight men killed. Immediately after the collision the wreck took fire and burned rapidly.

The officials of the road have not yet explained the cause of the accident, but it is alleged that an operator went to sleep on duty and failed to deliver an order. The burning wreckage destroyed the wires and cut off communication for some time.

Archbishop Ryan of Philadelphia is very fond of a joke and in spite of his multifarious duties finds time for many amusing quips. When Bishop Spalding of Peoria visited the archbishop some time ago it was arranged that the Western prelate should be entertained by a lady prominent in social and charitable affairs. The archbishop wrote him, giving some details regarding his prospective hostess, and ended his letter thus: "The lady who has all these virtues treats her husband like a brute, P. S.—She is very fond of brutes, being an officer of the Society for the Prevention of Cruelty to Animals."

Antwerp, May 27.—The British steamer Huddersfield, which sailed from this port yesterday evening for Grimsby, England, collided with the Norwegian steamer Uto. Huddersfield founded. Twenty-two Austrian and Italian immigrants lost their lives. The crew were saved. It is believed the immigrants were crushed in the collision. The bows of the Uto were damaged.

New York, May 27.—Four persons were suffocated to death and three others were so badly burned that it is feared they will die, in a fire early today in the five-story apartment house at No. 306 West 135th street. The fire is said to have been of incendiary origin.

Evergreen, Ala., May 26.—Dr. B. J. Shirley, of Moore County, was killed today by his two brothers-in-law, David and James Smith. More than twenty killings have occurred in the county during the past eighteen months.

Harrisburg, Pa., May 27.—The Republican State convention today endorsed President Roosevelt for renomination and declared against any change in the present tariff schedules. The State administration was strongly endorsed and no mention was made in the platform of the Grady-Sains libel law enacted by the recent legislature.

Mullins, May 26.—This morning about 1 o'clock fire was discovered in the large three-story brick tobacco plant of Schofield, Boatwright & Co. This plant is composed of three large buildings each separate, but connected by large fire doors. By much effort and hard work the fire was confined to one building, resulting in a loss of about \$18,000, partly covered by insurance. The loss included about 100 hogsheads of tobacco.

STATE SANITARY CONFERENCE.

Important Meeting of Health Officers in Columbia.

SECOND CONVENTION OF THE KIND

That Has Been Held in This State
---Summary of the Address of

Dr. Geddings on the Causes of Typhoid Fever and the Means of its Propagation.

Columbia, May 28.—The State Sanitary Conference was called to order today by President Reardon, of Sumter. This was the second convention that has been held. There were in attendance: E. I. Reardon, Sumter, president; Dr. J. M. Green, Charleston, secretary, and Dr. J. W. Falk, quarantine officer of the port of Georgetown, vice president. Besides these there were present, Drs. J. W. Babcock, J. H. Burkhalter, W. J. Rivers, S. F. Williams, all of Columbia; E. H. Hayden, Summerville; Peter Bacot, State sanitary inspector, Charleston; F. T. Legare, Charleston; George Coffield, health inspector, Spartanburg; T. Grange Simons, chairman of State board of health, Charleston; D. J. Hydrick, Orangeburg; Secretary James Evans, Florence; E. F. Darby, Magnolia; Assistant United States Surgeon General H. D. Geddings, Washington; G. M. Pollitzer, Charleston; James W. Corbett and W. J. Dunn, of Camden; J. S. Martin, Camden; J. W. Folk, Georgetown; Hall T. McGee, Charleston; Henry Horlbeck, Col. A. H. Hadyen, Summerville; T. H. Moore, Camden; M. W. Culp, Union; R. A. Lancaster and Lee G. Guerry, Frank A. Coward, of Columbia.

Dr. T. Grange Simons stated that an effort had been made to have the organization recognized by the General Assembly and that the outlook was hopeful.

It was decided to have regular sessions from 10 to 4 o'clock, and at 4 o'clock until evening. The programme of this afternoon was largely devoted to considering papers on pure water. Papers upon this topic were read by Dr. T. Grange Simons, of Charleston, and Dr. Folk, of Georgetown. Dr. E. F. Darby, president of the South Carolina Medical Association, made an address upon sanitation. Dr. Robt. Wilson, Jr., of Charleston, discussed "Malaria," urging an acceptance of the theory that this disease was communicated to man by insects, probably the mosquito, known as anopheles.

Dr. Geddings, who is sent as a representative of Surgeon General Wyman, of the United States public health and marine hospital service, delivered a most interesting address upon water supply as related to typhoid fever. The epidemic of typhoid fever at Plymouth, Pa., has become classical in medical history. No epidemic has been more thoroughly investigated than this. The town derives its water supply from a branch of the Susquehanna River. The surrounding territory is largely populated. It was shown that a suburbanite was brought from Philadelphia with typhoid fever, in midwinter, when the ground was covered with snow. The dejecta were carelessly thrown out upon the hill side, where they remained until the spring thaw, which washed them down to the river, about the intake pipe of the water supply of Plymouth, and the source of the epidemic was not discovered until typhoid fever had demoralized the whole community, and doctors and nurses from other towns and cities were brought in to assist in caring for the numerous fever patients. Springfield, Mass., which was noted for its pure water supply, was invaded by typhoid fever in the early 90's. The source of that invasion was traced to the milk supply. Investigation showed that the disease was confined to a single milk route for some time. The infection took place through leaks in the milk cans, which had been placed in a small stream to cool.

An epidemic in Savannah, in the spring of 1894, was traced to infection of the Savannah River, through a canal receiving sewerage and emptying into the river above the intake water pipe. Although this explanation of the epidemic was vigorously combated the number of new cases of typhoid fever rapidly ceased after the water of the Savannah River was cut off, and the new supply introduced from Artesian wells. Instances might be multiplied ad infinitum, proving that infection has gained access to the water supply through the dejecta of typhoid patients. The lesson taught was that the people should be shown the necessity of guarding their water supplies and so preventing these epidemics, which are attended with great suffering and mortality. There can be no more important subject than the careful guarding of the water supply against sewerage contamination. Typhoid fever is an intestinal trouble, and it is only fair to assume that a water supply proven to be affected by sewerage will sooner or later produce typhoid fever.

What can be done to prevent it? He believed that the curse of the smaller communities is the reckless disposal of household waste and sewerage. Surface wells are means of gathering surface water. It can be shown that a surface well will drain an area equal in radius to the depth of the well; into such wells cesspools often drain. Given one case of typhoid fever it will not take long for the water supply to become infected from dejecta teeming with typhoid germs. When rivers become infected with these germs innocent persons, a hundred miles down the stream may contract the disease by drinking the impure water. The time has come when the cesspool must go from a community or neighborhood. In some communities earth closets and chemical disinfectants will afford the greatest amount of protection. Rivers should be subjected to frequent sanitary surveys. Statutes should be enacted prohibiting dejecta being placed where water supply may be contaminated. Let the shallow well be abandoned and get the water supply from deeper strata; the deeper the supply the safer the water. Filtration is one of the best means of purification. Boiled water is an excellent theory; but it is difficult in practice, as individuals will sooner or later drink unboiled water, and the un-

PLAIN PROOF.

What This Gentleman Says is a Mere Statement of Facts.

No one can have any reason for dissenting from the particulars and proofs which follow, for verification of the same is within easy reach of every resident of this vicinity. That Doan's Kidney Pills promptly and effectually cure kidney complaints is substantiated not only in this particular case, but by all who have given them a fair trial. Testimony likewise shows that you do not have to take them indefinitely to be cured.

Walter McLachlin, a machine hand, employed at J. Holliday & Sons' planing mill, Wheeling, W. Va., address 3032 Jacob street, says: "Had I not used Doan's Kidney Pills when I did I would not be alive now. I was in a terrible condition and although I took quarts of medicine I got no better, but worse. Friends spoke of my bad appearance and thousands knew about it. I could hardly get around, and felt and looked like a dead man more than a living one. Doan's Kidney Pills were a blessing to me, half a box relieved me, three boxes entirely cured me and now I feel as though my back was as strong as that of any horse in Wheeling. I would rather have a box of Doan's Kidney Pills than the services of all the doctors in the state."

For sale by all dealers. Price, 50 cents. Foster-Milburn Co., Buffalo, N. Y., sole agents for the U. S.

Remember the name—Doan's—and take no other.

guarded act brings catastrophe. It is so unusual and difficult to isolate typhoid germs from a suspected water supply that it may practically be regarded as impossible, but if in it is found sewerage bacteria, such as the colon bacilli, it is justifiable to infer that it is only a question of time when the typhoid infection will appear in such a water supply. The reproach of having typhoid fever in any community ought to be deeply felt, and sanitarians in a few years must expect to be upbraided unless they can check the spread of typhoid fever.

Water supply cannot be regarded as the only means of infection, as was proven by the commission appointed after the Spanish-American war to explain the prevalence of typhoid among the volunteers. This investigation proved conclusively that the common house fly is frequently a source of infection, carrying the disease germs upon its feet and in its intestinal canal. The importance of this source cannot be over-estimated, and typhoid cases should be screened to prevent the spread of the disease.

Dr. T. Grange Simons' paper upon water supply was an admirable discussion upon a subject of growing importance to this section. It dealt largely with facts and figures, and was plainly stated.

Today the special committee appointed to examine the sanitary condition of the State House, in consequence of Mr. Gantt's letter, inspected the buildings, closets, cellar, etc. Dr. Robert Wilson, of Charleston, and Dr. Geddings, of the marine hospital service, went over the building with the committee appointed by Governor Heyward.—News and Courier.

SUMTER AS SEEN BY A VISITOR.

Old Sumter is a famous town, And all its streets with sand abound; 'Tis well adorned with shady trees, Whose lofty boughs bend to the breeze.

Its lumber plant supplies all need, With neatness and with rapid speed; Long leaf pine logs in great number, Are furnished for all the lumber.

A Telephone plant runs full time Its furnishings are superfine; The stock in ev'ry thing's complete, No plant with this one can compete.

Of plants enough has not been said, Another one works for the dead Makes finest coffins decked with grace, For mortal man's last resting place.

All these have ample stock on hand, And can supply ev'ry demand; This stock will favorably compare, With any that is made elsewhere.

Churches loom up for age and youth, In which is taught the way of truth; Free Salvation to ev'ry one, Through Christ the Father's darling Son.

The city schools are all first class, To train the young, nowhere surpassed; The fire department holds high rank, Water abounds in ev'ry tank.

Now long may Sumter's banner wave, O'er fair women and heroes brave; And when earth's toils with them are past, May "Welldone," greet them all at last. W. M. Foster.

Winthrop Commencement.

An invitation to the Winthrop College commencement, May 31st to June 3rd, has been received. The programme is as follows:

Sunday, May 31st—11 a. m., Sermon before the Y. M. C. A.—Rev. Churchill Satterlee, Columbia, S. C.

Sunday, May 31st—8.30 p. m., Baccalaureate Sermon—Rev. John Kershaw, D. D., Charleston, S. C.

Monday, June 1st—8.30 p. m. Joint Celebration of the Literary Societies.

Tuesday, June 2d—8.30 p. m. Class Day Exercises.

Wednesday, June 3d. 10 a. m. Alumnae Reunion.

11 a. m. Address before Alumnae. 5 p. m. Daisy Chain Procession.

Wednesday, June 3d—8.30 p. m. Address before Graduating Class.—Hon. Robert Aldrich, Barnwell, S. C.

Awarding of Diplomas and Certificates. Among the graduates are Misses Annie Holman, Annie Keels and Armida Moses. The graduating class numbers thirty-five this year.

Mr. G. Duncan Bellinger, who has been at John Hopkins hospital, in Baltimore, is rapidly improving and is expected home next week. His friends will be glad to know that he has recovered, but some interest was taken in his physical condition owing to his connection with the Tillman case. It has been thought that he would be unable to be present at the next term of court, thus necessitating another continuance, but unless something unforeseen happens he will be on hand. It is asserted that Tillman's attorneys will be ready for a trial.—Columbia Record.

Also assortment of Garden Seeds.

Havana Segars.

Large line of fine Havana Segars.

Toilet Articles.

A choice line of Toilet and Fancy Goods to which attention is invited at

DeLorme's Drug Store.

Kodol Dyspepsia Cure

Digests what you eat.
This preparation contains all of the digestants and digests all kinds of food. It gives instant relief and never fails to cure. It allows you to eat all the food you want. The most sensitive stomachs can take it. By its use many thousands of dyspeptics have been cured after everything else failed. It prevents formation of gas on the stomach, relieving all distress after eating. Dieting unnecessary. Pleasant to take.

It can't help but do you good

Prepared only by E. C. DeWitt & Co., Chicago. The 51c bottle contains 2 1/2 times the 5c size.
