THE MOSQUITO CRUSADE.

The Way to be Free From The Pests is to Remove The Mosquito Nurseries on Your Own Premises.

Complaints of mosquitoes are made to the health department from some sections of the city. but most particularly from portions of wards three and four. Wards one and two appear to be fortunately more free from the pests except in one or two sections, at least there have been less complaints from those wards. Strange to say in almost every instance where complaints were made the health officer found that the parties making the compaints were responsible for the raising of mosquitoes on their own premises by allowing water to remain in vessels of various kinds, and the parties were very much surprised when they were shown thousands of wiggle tails" in horse troughs, tin pans, flower pots, barrels, chicken troughs, and in one or two instances mosquitoes were found coming out of tion would have meant the payment cess pools, or dry wells, where the tops had small ho'es or cracks which had not been noticed by the owners of the wells. Kerosine oil or disinfectants poured in the dry wells will kill the mosquitos, but unless the tops are so tight that mosquitos cannot get in and out these insects will certainly breed therein. Horse troughs, cow troughs and buckets and half barrels There the animals are watered should be drained every other day and the "wiggle tails," if there be any, scrubrea out thorough's otherwise when water is again tu ned in the mosqu. tos begin to grow again. Unless every citizen will personally inspect his own premises very often to see whether mosquitos are being raised thereon and closely lo ! ofier their dry wells or cess pools there will continue to be

As a matter of fact, a great many scople, white and colored, do not know until told : hat wiggle tails' are embryo mosquitos. Tin cans also hold water which breed mosqui-

While mosquitos are not near as had here as they have been in former years, yet there are more than there would be if killed out.

The Diamond Cure.

stimulating the bowels, causing them to perform their natural functions as in youth and

IMPARTING VIGOR to the kidneys, bladder and LIVER. They are adapted to old and young.

Indigestion Causes Catarrh of the Stomach.

For many years it has been supposed that Catarrh of the Stomach caused indigestion and dyspepsia, but the truth is exactly the opposite. Indigestion causes catarrh. Repeated attacks of Indigestion inflames the mucous membranes lining the stomach and exposes the nerves of the stomach, thus causing the glands to secrete mucin instead of the juices of natural digestion. This is called Catarrh of the Stomach.

Dyspepsia Cure celieves all inflammation of the mucous membranes lining the stomach, protects the nerves, and cures bad breath, sour risings,

a sense of fullness after eating, indigestion, dyspepsia and all stomach troubles. Kodol Digests What You Eat Make the Stomach Sweet.

Bottles only. Regular size, \$1.00, holding 2½ times the trial size, which sells for 50 cents. Prepared by E. O. DeWITT & CO., Chicago, Ill.

RESULT OF HIGH TAXES.

Charleston Canning Company Abandons Promising Industry on Ac count of Heavy License.

Charleston, July 26 .- After purchasing a site for \$15,000 and actually beginning the construction of its oyster cannery, the Independent Canning company has determined to dissolve the corporation on account of the excessive tax and license law of the State, the full effect of which appears not to have been realized until the actual building of the factory had been begun. There was a disposition among some of the stockholders to test the validity of the act and take the chances with refund of a part of the tax and license later on, but the majority was opposed to making any fight against the State law, and the dissolution of the corporation was the only alternative.

The company was organized with a paid up capital of \$40,000. Its operaof \$5,000 in wages weekly in Charleston. The heavy tax and license are in effect only in Charleston and Georgetown counties. Strange to say, the bill which became a law was introduced by the Charleston delegation. The local branch of the big Gibbs Preserving company of Baltimore will operate its factory, but the local company is crowded out by the high tax and license.

RICHARD CARROLL'S SON SHOT.

An Accident Sundayy Afternoon at the Industrial Home.

The 14-year-old son of Richard Carroll, the noted colored preacher and lecturer, was shot in the foot Sunday afternoon and the member had to be amputated.

It seems that Barney Carroll and Benny Strobel, an inmate of the industrial home conducted by Richard Carroll, were walking along towards a melon patch which had been so often raided by thieves that it was necessary to maintain a guard. Young Carroll was walking in front and the other boy was following him with a loaded shotgun, which in some manner was fired and the load entered the left heel of the boy in front, tearing the foot practically off. When Dr. J. H. McIrtosh reached the place he found that the leg would have to come off above the ankle and the boy was taken to the Taylor-Lane hospital, where the operation was performed. The boy was said to be doing very well last night.-The State.

Do We Want Winter Tourists in Sum-

Mr. Edward P. Young, of Boston. Mass., has written Mr. T. S. Gregory to ask him if he can tell him how many winter tourists can be accommodated in Sumter in private families as well as hotels and boarding houses. Mr. Young has suggested that it would perhaps be well to have photographs taken of such rooms and the furnishings as will be offered, and it is well also in some instances where parties have pretty and attractive homes to take photographs of the exterior of the house and the front grounds, as very often the appearance of a house and the surroundings appeal to people. Prices for board are also wanted. The photographs of a number of pretty houses would be a good advertisement for Sumter, and might also possibly result in a sale of the property at a good figure. The Chamber of Commerce has taken the matter up with Mr. Young and has sent him a lot of information about Sumter as a suitable place to winter. Mr. Gregory has of late been sending off quite a number of the Chamber of Commerce advertising phamplets to different people with whom he corresponds in the envelopes containing business correspondence. About 15,-000 of these pamphlets have been distributed broadcast over the United States of late in such manner, and the city of Sumter has attracted the attention of many people in distant

Anyone interested can consult with the secretary of the Chamber of Commerce, to whom Mr. Gregory has referred the matter.

St. Petersburg, July 27.-General Linevitch reports the Japanese have landed a battery at Castries Bay, near Vladivostok and have raised the Japanese flag at that point.

Death to Mosquitoes. Charleston, July 27 .- A meeting

of the special committee of the board of health was held today when the quarantine situation was again fullyy Replies were received from the Southern railway and the Atlantic Coast Line acknowledging receipt of the communication of the board on the matter of bringing cars and passengers from infected points into Charleston, and promising to cooperate with the city authorities in keeping the fever out of Charleston. The board of health promulgated today a circular of information and advice to the public, urgently and requesting the cleaning of all premises, and especially the destruction of the mosquito. Attention is asked to be paid to all vessels containing water, and also to vaults and cesspools, where mosquitoes bred, that the number of the insects, which largely propagate the disease, may be reduced to a minimum. The use of oil is urged and in the case of cisterns and wells. netting should also be used to cut
