THE EDDY SUIT.

of the Money.

Concord, N. H., June 5 - Justice Chamberlain of the super or court today handed down a decision denying the motion of Henry Baker, and baid the enemies of the sect we begun south: the great legal battle. This decision clears the way for the trial of the main question in the suit, which is, "Shall the so-called Pleasant View clique' be compelled to show what has been done with the millions which Mrs. Eddy is supposed to have received during the past few years from the sale of her books and the contributions of her followers."

Cured Hemorrhages of the Lungs. *"Several years since my lungs were so badly affected that I had many hemorrhages," writes A. M. Ake, of Wood, Ind. "I took treatment with several physicians without duced her acreage fully 40 per cent... any benefit. I then started to take Foley's Honey and Tar, and my lungs are now as sound as a bullet. I recommend it in advanced stages of lung trouble." Foley's Honey and Tar stops the cough and heals the lungs, and prevents serious results from a cold.. Refuse substitutes. Sibert' Drug Store.

The statement is as follows:

"Having written to the State presidents as to the condition of the crop and the outlook. I want to give to the public a few of the replies that have come to me from men whose standing in their community attests their integrity: therefore, what they say may be relied upon.

"From Henderson, Texas. J. S. Hickey, president of the First National bank, writes, under date of May 27. as follows:

"'The outlook in Texas is sorry indeed for cotton. East Texas has reand many farmers are still plowing ap cotton and planting peas and corn; many have planted three times and still have a sorry stand. The boll weevil is here in great numbers, and many farmers have no hopes of making any cotton at all. So you can see why they are replanting in something elese. Middle Texas-the black land district-has nearly all been replanted, and the crop will be necessarily late. I talked with some farmers from Ellis county last Thursday and they told me they had to plant the second time, and are not done planting yet. Further west, in Mitchd. Coleman, Taylor and Tom Green and that whole section, have had no rain since December, and consequenty could not plant corn or cotton. If they make any in that section it is yet to be planted. South Texas was forced to replant, and, as a consequence, the crop is late, with much complaint of boll weevil. In my section they-the boll weevil-are pucturing the squares on all early cotton. Farmers told me Saturday that or early planting they find three or four matter how irritable or how obstinate to the stalk. So the general outlook

"T. C. Long, from Jackson, Tenn., nder date of May 28, writes in par:

"The outlook for a cotton crop in Fennessee is extremely bad. The enfire crop was planted over, and it is yet up. Under very favorable con

litions we may raise a half crop. This morning mercury down to 40 degrees and frost visible. You car draw your wn conclusions.'

"These two letters are in keeping with those from Mississippi, Arkaneas. Louisiana and Alabama. South Carolina, North Carolina and a portien of Georgia seem to be best of while the outlook in these States is certainly below anything like an average crop. The public will bear in mind that this is the 1st of June. And since the writing of these letters quoted torrential rains have covered the entire cotton belt. We have been struggling for three years to get the situation in our hands. It seems as if Providence has given us the opportunity to realize our hope. From the present outlook and from the princiles involved it seems as if the farmrs and merchants would refrain from selling cotton for fall delivery a price which neither the outlook of a crop nor the present price of manufactured goods warrants. the Southern Cotton association in its relation to the cotton of the world is concerned the majority of us do not propose to take advantage of a cotton famine and the disastrous scarcity of cotton to force the price to unwarrantable heights, no more than wpropose when seasons are propitiou and the supply is over-abundant to at low the price to be disastrously depressed. Our Vetch and Alfalfa.

We wish every farmer in the county had plots of vetch and alfalfa.

The writer is just cutting a crop of vetch and oat hay that stands four feet high and is so thick that a rat

can hardly get through it. The first cutting of alfalfa from the five-acre field on J. L. Coker & Company's farm was made three week, ago. This cutting yielded two tens of dry hay (800 pounds per acre) and the field will yield a larger cutting than this in a week or ten days.

The writer made five cuttings aggregating 6 1-2 feet from a small plot last season, and we have already cut this plot twice this season (about 18 inches each time).

Both vetch and alfalfa hay are much relished by stock, and we do not see why every farmer should not have a small acreage of each .-Hartsville Messenger.
