INCOME TAX WILL WAIT.

Maryland in No Hurry To Act on Federal Amendment.

Annapolis, Feb. 3.—Maryland will be in no hurry to act upon the proposed income tax amendment to the Federal Constitution. Members of the committee upon Federal Relations, of which Senator Campbell and Delegate Henderson are chairmen, desire to have full and free discussions of the subject and to consider it from all viewpoints.

In fact, the position to be taken by the Maryland legislature will be left probably to the decision of the Democratic caucus, which is to be held later for the consideration of political measures and the fulfillment of platform promises.

The Committees on Federal Relations are among those without committee rooms, and, so far, have had no place in which to meet.

*LaGrippe pains that pervade the entire system, LaGrippe coughs that rack and strain, are quickly cured by Foley's Honey and Tar. Is mildly laxative, safe and certain in results. Sibert's Drug Store.

That happens in a moment which may not happen in a thousand years.—French.

BOYS' CORN CONTEST.

Mr. O. B. Martin Tells All About the Scheme.

It is worth while to get a boy to form a good purpose and work persistently toward its accomplishment. If a number of boys can be induced to strive for the same goal, with a spirit of friendly rivalry which stimulates observation, study, industry and economy, then the good results will be increased many fold.

Such is the plan of the Boys' Clubs in the farm demonstration work. In order to get the best results it is not only necessary to get the boys to unite their efforts, but it is also essential that other vital forces in the county co-operate. One of the strong features about the demonstration work is that it is co-operative. So in the Boys' Department we frequently find the county superintendent of education and teachers, the demonstration agents, the business men, the newspapers and the parents giving aid and support.

Where this work is being introduced in a county, the county superintendent of education and teachers can reach the boys in all sections of the county more quickly and more effectively than any other agency. The superintendent can explain the plan to the teachers, and they can explain it to the boys and secure the names of all boys who will agree to plant one acre of corn. It is best to begin with corn. It is a fine subject for study, and our people need to raise more corn in order to be prosperous and independent.

After this is done a meeting of all boys interested should be held at the court house for the purpose of organization and instruction. Such meeting should be held early in the season so that every boy may have time for proper preparation of soil and selection of seed. For the first year it has been found advantageous to see that first class seed are furnished to all of the boys alike. After that each boy should select and breed his own seed. Wherever a special agent of the U. S. department of agriculture is located in a county it will be found that he will gladly help in giving instructions and advice in regard to the agricultural part of the work, either to the county club or to local groups of boys whom he may meet in his rounds over the county.

Prizes and Premiums.

If the merchants and their public-spirited citizens have been visited and the work explained to them before the general meeting of boys, there will be a fine list of prizes to announce. There have been many commendable contributions to this cause in various parts of the country during this year. It adds considerable interest to the work to offer prizes like the following which have been selected from different lists in the South for this year: A trip to Washington, \$50 in gold, \$10.00, \$5.00, a nice buggy, a first class bicycle, a strong two-horse plow, a double-barrel shotgun, at \$5 hat, a \$15 suit of clothes, an up-to-date corn planter, a ton of fertilizer, a two-horse wagon, and other articles of utility and value. Some boards of trade and chambers of commerce have made appropriations direct for prizes and some have given fine recognition to the efforts of the Boys' Clubs by giving them banquets and street car and automobile rides.

Circulars and Bulletins.

Just as soon as the names of all of the boys are assembled in the office of the county superintendent of education, duplicate lists should be sent to Dr. S. A. Knapp, Washington, D. C., who has charge of the farmers' co-operative demonstration work. These boys will from time to time receive circulars of instruction and information in regard to preparation, fertilization, cultivation, seed selection, etc. The circulars furnish excellent subject matter for discussion at a club meeting or for a lesson in school. They also lead to further study of farmer's bulletins and books.

A boy will profit from such lessons, discussions and books because he is making practical application of the principles that are taught. He learns because he needs it and not because it is scientific.

Rules and Awards.

It is not necessary to have many rules. A few regulations, however, are necessary in order to prevent misunderstanding. It is well for the boys to elect their own president, vice president, secretary and treasurer. Some clubs have badges of membership in the shape of a button with the name of the club, name of the county and state, and the year printed or engraved upon it.

1. Boys joining clubs and entering contests must be under eighteen years of age.

2. No boy shall contest for a prize unless he becomes a member of a club.

3. The members of the clubs must agree to read the instructions of the demonstration work.

4. Each boy must plan his own crop and do his own work.

5. Exhibits must be delivered to the county superintendent of educa-

tion by October 16th.

6. The amount of the yield and the method of measurement must be certified by each boy and attested by at least two disinterested witnesses, who shall be satisfactory to the county superintendent.

7. In awarding prizes the following basis shall be used:
(a) Greatest yield per acre... 30 per cent.
(b) Best 10 ear exhibit... 15 per cent.
(c) Best written account showing history of crop and all expense... 30 per cent.
(d) Best showing of profit on investment... 30 per cent.

Experts from agricultural colleges and departments of agriculture and leading farmers should be invited to act as judges and also to give talks on corn judging and seed selection. In estimating profits uniform prices should be used, for instance; \$5 per acre for rent, 10 cents per hour for the work of each boy, and 5 cents per hour for each horse.

Fairs and Exhibits.
When there is a county fair the boys' exhibit should be shown there. If no fair should be held in a county, the boys' exhibit should be collected in the court house or some other public place easy of access.

A good exhibit of a Boy Club may lead to the establishment of a county fair. Exhibits of local clubs at school houses stimulate the work and give fine opportunities for general instruction. Although the clubs may start with corn, the development naturally leads to exhibits of other farm and crops.

Results.

The object of the Boys' Demonstration work is the same as that among men, namely, better methods of farming and greater yields. Many of the boys in clubs who begin to study agriculture in this way will continue the study in the agricultural colleges. Others will continue such efforts on their farms, and all of them will make more useful and more efficient citizens. From the pleasant and profitable experience of owning and managing their small plots they will develop into independent, intelligent farmers. The country needs such a citizenship and such a life offers and will offer great opportunities for some years. The professions are crowded and the wage-earner must pay high prices for the necessities of life. The wise and judicious producer can enjoy health, wealth and contentment. The question is how many boys can be reached and influenced thus to succeed.

*An attack of the grip is often followed by a persistent cough, which to many proves a great annoyance. Chamberlain's Cough Remedy has been extensively used and with good success for the relief and cure of this cough. Many cases have been cured after all other remedies had failed. Sold by W. W. Sibert.

"Are there traitors in the camp of Taft?" asks the New York Press. Prithoe what else is that camp composed of?—Louisville Courier-Journal.

Won't Need a Crutch.
*When Editor J. P. Sossman, of Cornellous, N. C., bruised his leg badly, it started an ugly sore. Many salves and ointments proved worthless. Then Bucklen's Arnica Salve healed it thoroughly. Nothing is so prompt and sure for Ulcers, Boils, Burns, Bruises, Cuts, Corns, Sores, Pimples Eczema or Piles. 25c at Sibert's Drug Store.

HOW TO CURE RHEUMATISM.
It Is an Internal Disease and Requires an Internal Remedy.
The cause of Rheumatism and kindred diseases is an excess of uric acid in the blood. To cure this terrible disease this acid must be expelled and the system so regulated that no more acid will be formed in excessive quantities. Rheumatism is an internal disease and requires an internal remedy. Rubbing with Oils and Liniments will not cure, affords only temporary relief at best, causes you to delay the proper treatment, and allows the malady to get a firmer hold on you. Liniments may ease the pain, but they will no more cure Rheumatism than paint will change the fibre of rotten wood.

Science has at last discovered a perfect and complete cure, which is called "Rheumacide." Tested in hundreds of cases it has effected the most marvelous cures; we believe it will cure you. Rheumacide "gets at the joints from the inside," sweeps the poisons out of the system, tones up the stomach regulates the liver and kidneys and makes you well all over. Rheumacide "strikes the roots of the disease and removes its cause." This splendid remedy is sold by druggists and dealers generally at 50c and \$1 a bottle. In tablet form at 25c and 50c a package. Trial bottle of Tablets sent by mail on receipt of price 25c. Booklet free. Write to Bobbitt Chemical Co., Baltimore, Md. Sold in Sumter by Sibert's Drug Store. 11-19-W. & S. wed.

'Time's Flight Turned Backward' SAGE AND SULPHUR Made Her Look Twenty Years Younger

READ MRS. HERRICK'S SWORN STATEMENT
STATE OF NEW YORK } ss
COUNTY OF MONROE } ROCHESTER, N. Y.
Nancy A. Herrick, being duly sworn, deposes and says: When I was a girl, I had a head of heavy, long, dark brown hair which was the envy of my schoolmates, and which attracted the attention and remarks of strangers. As I grew older, my hair commenced to come out, just a little at first, but gradually more and more, and then began to turn gray. I was induced by the many good reports I had heard of Wyeth's Sage and Sulphur Hair Remedy to try a bottle. My hair was quite thin and gray when I began using Sage and Sulphur, and you can imagine my satisfaction when I found that it was fast coming back to its natural condition, being thicker, darker and more glossy than it had been for a long time. I continued to use Sage and Sulphur, and my hair is now as heavy, dark and smooth as when I was a girl of sixteen. It is now four years since I commenced using Sage and Sulphur, and my hair is still in splendid condition.

Preserve Your Youth and Beauty by Using WYETH'S SAGE AND SULPHUR HAIR REMEDY

It Is Pure, Safe And Reliable
It Is Not Sticky, Oily Or Greasy
It Is An Elegant, Refreshing Dressing
It Makes The Hair Soft And Glossy
It Quickly Removes Dandruff
It Restores Faded And Gray Hair To Natural Color
It Stops Hair Falling And Makes The Hair Grow
It Will Make You Look Years Younger
PRICE AT ALL DRUGGISTS
50c. and \$1 A BOTTLE
If Your Druggist Does Not Keep It, Send Us The Price In Stamps, And We Will Send You A Large Bottle, Express Prepaid.
FOR SALE AND RECOMMENDED BY W. W. SIBERT'S DRUG STORE.

Sworn to before me this 14th day of July, 1907. Henry W. Hall, Notary Public.

Nancy A. Herrick

How Do You Feed Your Crops?

DO YOU KNOW just what your cotton and corn need, and are you furnishing it in such quantities as required and in such shape that the plant can use it?

Suppose you should put the food for your stock in a box, nail it up and place it in their trough—would you expect them to thrive and grow fat?

Hardly! Well, did it ever occur to you that when you use lumpy, badly mixed fertilizers you are putting this same proposition up to your crops—offering them plant food in such shape that they can't get to it?

Fertilizers, to do your crops any good, must dissolve in the soil waters. These are constantly in motion, rising to the surface during the day and sinking at night—passing and re-passing the roots of the plant, which absorb the food contained in the water—and this is the only way in which the plant can feed.

Therefore, when you buy fertilizer, you should do so with the idea of furnishing food for your crop and on the same principle that you should purchase food for your stock. It should not only contain the necessary Ammonia, Phosphoric Acid and Potash, but above all else these should be in soluble form—the mechanical condition of the fertilizer should be such as to permit the plant to absorb every particle of it, and the goods should be manufactured from materials that will not give up their plant food at one time, but furnish a steady supply throughout the entire growing season.

This is the fertilizer you should have and can get—in only one way. It is impossible to produce a goods like this by the dry-mixing of raw materials, whether you do this at home with a shovel and a screen or buy it from someone who has made it the same way—the only difference being in the quantity.

These materials must be ground to a powder, and it requires machinery costing thousands of dollars to do it properly. They must then be so manipulated that when complete, you have a compound, each ounce of which is exactly like every other ounce, and not a mixture, one part of which would contain too much Ammonia and too little Potash, while another part would be exactly the opposite—and all of it contain plant food locked up and not available.

Remember that the chemical analysis of a fertilizer is no test of its crop growing qualities. The chemist can pulverize lumps and by the use of various means search out the plant food; your crop can't.

You can take an axe, break open the box and get the corn; your mule can't.

Don't risk a crop failure! Insure your peace of mind as well as your crop by using
