The penalty for failure to take returns applies whether the ompany is liable for the tax or not. The heavlest taxpayer under the ew law in South Carolina will pay omething over \$2,000. The cotton nills have to pay from a few hundred tollars each to from \$1,000 to \$1,500 each, the more prosperous among them, while of course several of the mills will not have to pay anything. There are several railroad and street car companies which will be heavily taxed. If Major Jenkins' estimate as to the total tax to be realized from this State annually is realized there will be a merry old kick against the law from this State. It will amount to one\_seventh the present State tax, and this section so little favored by the Federal government on account of politics will feel sore over the drain. In this connection it is perhaps pertient to remark that had it been known while the Legislature was in session that this tax would amount to so much from this State the pasbond. sage of the Federal individual income tax amendment would have had a harder passage through the senate, and possibly it would have failed of passage. As it was the proposed amendment was vigorously fought.

Court House Was Crowded All Day Congressman Edwards of Georgia Monday During the Whiskey Trials -Lots of Time Lost in Securing a Jury-City Wins First Victory.

Interest in the whiskey cases is great. The court house was crowded from start to finish Monday. At times standing room was at a premium, Every spectator gave the utmost atten. tion to what was being said.

A great deal of time was lost in securing a jury. In some cases the juror could not be found, while in others he was exempt for some cause or other. Three different drawings had to be made before the jury was complete. The following gentlemen tried the cases:

Messrs. J. H. Chandler, foreman; M. B. Randle, T. V. Walsh, A. M. Broughton, E. H. Rhame.

The indictment against E. O. Bostick was read to the jury and the first witness, Mr. H. G. THIS WEEK TO SEE REVIVAL OF ACTIVITY IN MARKET.

Unable to Secure Spot Cotton, Mills Are Buying Futures-Bulls Hope Farmers Will Hold On-Bears Say They Will Weaken-Cotton Market's Most Interesting Situation.

New Orleans, La., Feb. 27 .- Brokers in the cotton tarde claim that signs are now in evidence that lead them to believe in a more active mar\_ ket during the coming week.

If the expected entry of the spinners into the future market as active operators takes place it will mean that one of the most interesting situations in the history of the cotton market will be created. The developments of the last week have shown that mill owners have bought cotton futures and especially March contracts because of the growing difficulty of buying spots. If, during the immediate future, their purchases ex. tend to May and July, the other active old crop months, it means that they will have decided that their only hope for supplies at favorable prices to them this season is to buy contracts, constantly held below the level of spot values, as they are by the operations of powerful bear interests.

That is the bull view of it and bulls, of cuorse, are very hopeful that the consumers of raw cotton will be such powerful allies that the bears will be covered with confusion and losses.

But the bears have opinions of their own on the subject. They contend that the spot holder is weakening as the time of planting the new crop draws near and that during the coming week he will probably be only witness. He might be called the star "From time to time, out of a fit of too glad to deal with exporters, who witness. He stated that he went to political desperation, the country is want to fill first half of March shipments. They point out that should the remnants of the crop be turned the season and become more than ever convinced of the truth of the old market proverb about not attempting to bull the tail end of a short crop. So far as the powers of spinners and spot houses are concerned the bear side is perfectly convinced that the leaders on the short side, with their enormous winnings of the season and with their original capital still intact, can easily resist a world wide bull movement. They recall the almost hopeless task the bear leaders undertook when they first started to stem the bull campaign, how they were forced to sell day after day on a rising market, how they pocketed losses reaching, it was said. into the millions, but nevertheless kept on selling and predict that the bear leaders themselves will welcome fresh signs of bull activity during the week to come as eagerly as the bulls themselves, because it will mean fresh victories and more profits for them. It is seldom that the battle of the powerful interests as now seems to be lining up. Every move during the coming week will be eagerly watched by the thousands of small spot holders in the South. they have heavily taxed themselves for his education; they have given him every opportunity to earn a respectable livelihood, they have given him justice in the courts: they are gladly giving him aid along his journey toward self respect and self-reliance. The negro in the south has all the rights of citizenship save only that of suffrage and he has that except as it is deined him under qualifications set forth in compliance with the laws and the rights of certain states. The Anglo-Saxon is the only race that has thus far successfully solved the great problem of self government. For this great task that race had centuries of preparation. Magna Charta to the Declaration of Independence much precious blood was shed to establish government by the people. From the foundation of our government down to the present day the people have settled every question that prsented itself, and toexample in all the world of a wellbalanced, well-established, democratic republic.

## A New Way to Swear Off Taxes,

The best way of not paying taxes on your personal property is to swear them off. By "swearing off" is meant going to the tax assessor and making a deposition that you really don't live where you seem to live, that you really don't own what you seem to own. and that, while you appear to be very rich, you are really over-burdened by debts winch you have heretofore successfully concealed. Since personal taxes began, so many ways of swearing off have been invented that the tax authorities had come to believe that there was no new tax dodge under the sun.

But the tax authoritles were mis-A few days ego a man came taken. to the New York tax commissioners and asked to be relieved of his personal taxes. "I have only \$5,000," he said, "and that money is in city bonds and is being held in trust."

The question was unexpected and at first there was no answer, but the tax commissioner insisted. Finally, in a stage whisper, the swearer-off explained.

bought it for the detectives. It looks like they were acting as the agents for others who are higher up. It may come out at the trials who is furnishing booze to these "strikers," who have been hauled before the court. Whether any convictions are secured or not, Saturday's work was one of the best day's work done by the police department in some time. The manner in which the arrests were made reflect credit upon the police department. There were twenty-seven

Atter drinking Bostick offered to sell him a quart just like it for \$1.25. He did not ask Bostick for the whiskey, as Bostick did not give him time. Bostick seemed anxious to make a sale.

Bostick sold him another quart at the same price.

> Bateman testified that he had been employed by Alderman Ligon as a detective to run down the tigers.

J. H. Clifton, Esq., counsel for the defendant put Bateman through a severe crosss-examination, doing all in his power to discount his testimony. During the examination Bateman denied that he told Bostick that he had a sick wife and child.

Alderman Ligon stated that he was authorized by council to employ detectives to catch the blind tigers. He saw Bateman every day or so and that Bateman was sober when he saw

The defendant, O. E. Bostick, testified in his own behalf. Bostick's place on the morning of called upon to witness the spasmodic February 17. Bostick asked him how efforts of some gentleman on the other side of his chamber, to destroy loose all speculators would lose faith white supremacy in the south. But in the long side for the remainder of while white men live it will never be done. These gentlemen who prentend that they would put force bills and reduction of representation upon the south, hardly mean it. I cannot belleve they are sincere in their announced purpose.

> "If this proposed reduction was made, it would be for no other reason than that these ten southern states have dared to exercise their rights, as guaranteed to every state of the union, under the constitution. These ten southern states are to be chastised and the people thereof humiliated and trodden upon, for doing what they had an absolute right to do. The gentleman from New York and the few who agree with him in this unjust measure hardly know the danger of the 'dynamite' with which they are

United States, for not until then will rings have been fought by such any state suffer humiliation because it dares to purify the ballot and morals in its borders, by prescribing certain

restrictions as to who shall be permitted to exercise the right of franchise and to control its government.

"Mr. Chairman, I protest against this attempt at political discord. My people, the southern white people as a whole, have done their full duty by the negro. They have done more than ought to have been expected of them;

whiskey on February 17. The shipment was from Newport, Ky., where the whiskey in evidence came from. This concluded the testimony, the attorneys took ten minutes each for addressing the jury.

Mr. Clifton asked the jury if they would believe a hired man, whose business it was to hunt up such cases rather than a reputable business man of Sumter. He had a strong plea for his client.

Mr. Jennings put his usual vim into his argument and made a telling speech. In reply to Mr. Clifton's plea to believe a reputable citizen rather than a hireling, said that blind tigers could only be caught by hirelings. No man who was not hired would do the day this country is the most shiining job. He left the matter with the jury. He did not want a conviction unless the jury thought that the defendant

was guilty. The Recorder charged the jury as General Jones, with the approval of like the first, unless he picked it up to the law and they retired to the jury room. In about five minutes they re- been accored him in the south.
