

Would You Get Perfect ON THESE ?—?—?

92	+	6	=	-	-	150
71	+	8	=	-	-	125
13	+	6	=	-	-	25
23	+	16	=	-	-	50

Hardly---Unless "Teacher" was "Asleep at the Switch."

But astonishing as it may at first appear—it's an absolute fact that very often 92 plus 6 makes 150 at the Wreck Store. Do you see the point? AT THE WRECK STORE you can buy most any article that you are accustomed to paying \$1.50 for at the low price of 98 cents. You can generally buy a 50 cent article at 39 cents and so on through the list. So you see that your money counts MORE at the Wreck Store. In other words it's a matter of "MORE FOR A DOLLAR THAN A DOLLAR WILL BUY ELSEWHERE."

Looking at it hurriedly a penny seems mighty small, but it's a certainty that if you had ENOUGH PENNIES you could roll around some day and ask John D. Rockefeller to go autoing with you. The only way on earth to pile up the pennies is to save something on every purchase you make. And that's where you get a tip to plant your feet on the paving blocks that lead to the Wreck Store. SAVING YOU MONEY is part of the Wreck Store's business—the greater part, because QUICK CASH sales and GREAT BIG SALES enables us to buy whole stocks and pay cash when the fellow who has the stock NEEDS THE MONEY.

And the chances are when you go to the Wreck Store for something in Men's, Women's or Children's wearing apparel you will find what you want.

Our Spring stock of Oxfords have just arrived, come in and look them over.
