Upon all other questions the conthe bill this wek is hoped for by the onferees but not regarded as certain. Representative Lever, heading the house conferees, and Senator Chamberlain, who handled the bill in the senate for the administration, will take up with President Wilson tomorrow the two remaining differences. The conferees will meet again afterwards. Several of them, however, believe a partial disagreement ic will result in submission of disputed questions to both legislative branches for another vote. Numerous other changes have been agreed to in the bill, with most of the principal sen ate amendments accepted.

The conferees agreed that in addiion to foods, feeds and fuels, the govnment shall control "fuel oil and itural and fertilizer and fertilizer ts, tools, utensils, impleand equipment required for the TEMPE

MERCENT going to win, and we ave got the whole power of the States to draw upon. The d States is today the general reve of the Entente. With that reerve intact, we may look the fourth year in the face with entire confidence.

"Germany has made the same mistake with regard to the United States, as three years ago, she made with resurd to England. She argued, "we do not believe England will come in but, if she does come in, she is not military nation and cannot become a military power soon encugh to play any part in this war." We proved that theory wrong as you will prove her theories regarding the United States wrong.

What was it that led Germany into war with the United States? She ound she could not win on land. It was necessary to try u-boat warfare. been the year before. "This," said the German theorists, 'will defeat England and bring the reign of the Entents to an end. We do not believe the United States will come in, but if she does, she is an unmilitary nation, has no army, cannot create one for many months, perhaps years, certainly cannot become a military factor soon enough to play any part in this war."

"That reasoning sounds unbelievable to us but a drowning man clutches at a straw. We believe the German theorists will be proved as wrong in their estimates of the United States as they were in their estimates of England.

"You asked me what is the outlook at the opening of the fourth year of the war. First, let me give you in epitome the history of the first three years as I understand it.

"The first year, broadly speaking was an attempt by Germany to put into effect elaborate plans which het military strategists had been preparing over the space of many !on
