DROUGHT IN WEST TEXAS.

oken by Three Good Rains in May.

xas for two or more years, causing gress." tle less than disaster to the cattle good, soaking rains fell in that dis- are not paying their just proportion trict within the first seventeen days of taxes, as his text, and told the house of May. Grass is now coming out, that Wall Street speculators would be water holes have been partly filled pleased to see an overabundance of and a general spirit of optimism prevails with the cattlemen, many o whom staked fortunes on the effort to and add to the profits of manufacturhold out. Ranchmen, who had waited from month to month for the rains shipped thousands of heads of cattle ou of this district to other ranges. Many dollars were spent by the stockmen on feed to keep alive those few cattle that remained on the ranges. They declare that had the rain been delayed another six weeks, the plains o Texas would have been practically deserted of cattle. All of Texas west of a line drawn north and south through San Antonic constituted the drought district, prac tically all of which is devoted to the attle raising industry. Part of the listrict, however, contains some agricultural land, devoted mostly to truck farming. Little cotton or cor is grown. The drought began in some section: late in the summer of 1914, and al most ever since the cattlemen have had a fight on their hands to save the nerds with which the ranches were populated at that time. In 1915 the situation grew more serious and thrainfall was far below normal. Early n 1916 a large part of the district had fair rains, but there were many Miss arge areas which had none and others where the rain fell so rapidly that it did little good. Throughout the summer of 1916, all through 1917 and well into 1918 conditions grew steadily worse. Pioneers of West Texas declare it was the worst dry spell that has fallen over that section in a century Dust storms which swept the section a few weeks prior to the rains were the worst and most severe experienced in a generation. In San Angelo the dust storm was so severe that al outside work had to be suspended and the sky was so dark that it was necessary to use electric lights for indoor work. A general influx of cattle which had been shipped out of West Texas, is expected to begin soon. Cattlemen however, point out that it will require years to stock the ranches as before the drought hit the ranges.

The French recaptured Hill enemy.

INVESTIGATION ORDERED.

Classification to Be Revised-Many Men in Class Four to Be Put in Class One or Two.

Washington, June 7.- A general revision of classifications under the selective draft act was instituted today by Gen. Crowder when he telegraphed the governors of all the States ordering an investigation 'to determine the reason for the small number of registrants in Class One in some local boards. Thousands of men now in Class Four should be put in Class One or Two, he said.

It is expected that the rearrangement will bring into class one more than five hundred thousand men. It is announced that the class of 1918 Not tardy for a period of between registrants will not be allowed to enven and twelve years: Constance list in the navy or marine corps. No voluntary inductions will be granted until the order of serial numbers has

cotton on the market, which would reduce the price of the raw material ers of materials from raw cotton.

"The embargo on shipmens of cotton on railroads was followed by the calling of all loans on cotton by the banks," Mr. Stevenson said. "The cotton is becoming more valuable and the only reason for a desire to call the loans is to force a sufficient amount on the market to depress the price. which can only add to the 300 per cent profit already being made by the manufacturers.

"The statement that cotton farmers escape taxation because of their influence in congress is not true, if it means that they are not burdened with war taxes. If the Wall Street gentry desire that a specific tax be levied on each pound of cotton, on each bushel of wheat and on each yard of cloth, they would put these people in a different class and tax them specially. That would be a poor return for the patriotism which hey show in endeavoring to produce the things which the government says are necessary to win the war."

Mr. Stevenson called attention to igures showing that the cotton growers produaed from August 1 to April 30 last, cotton seed meal to the extent of 1,912,605 tons and refined oil to the extent of 1,007,887,195 pounds.

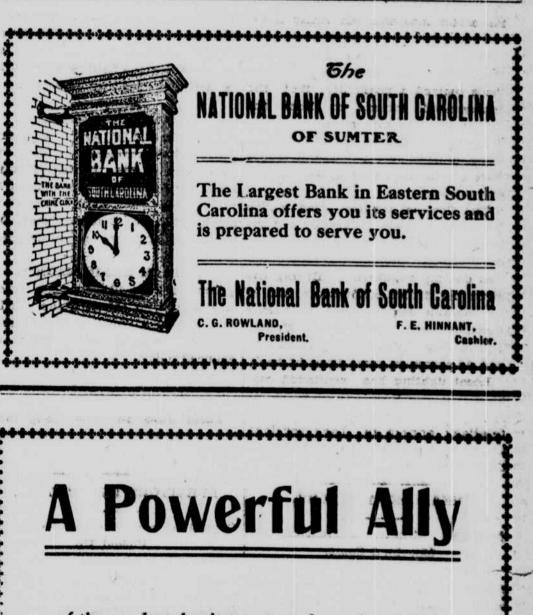

DON'T EXPERIMENT.

You Will Make No Mistake if You Follow This Sumter Citizen's Advice.

Never neglect your kidneys. If you have pain in the back, urintry disorders, dizziness and nervousness, it's time to act and no time to experiment. These are frequently symptoms of kidney trouble, and a remedy which is recommended for he kidneys should be taken in time. Doan's Kidney Pills is a good rem-

edy to use. No need to experiment. It has acted effectively in many cases in Sumter. Follow the advice of a Sumter citizen.

Mrs. B. P. Cuttino, 109 Blanding Street, says: "Six years ago I had inflammation of the bladder and I was in bed with severe backaches and headaches. I was in bad shape and my nerves were unstrung. I tried different things to get relief, but didn't

of the modern business man is a dependable financial affiliation.

It not only assists him in meeting present demands but co-operates with him in planning the future.

Armed with this support and assurance, he is able to wage a stronger campaign for growth and progress.

This Institution offers a full measure of helpful co-operation to commercial interests.
