PROSPECTUS. Volume Fourteen begins September 11, 1858. Mechanics, Inventors, Manufacturers

and Farmers.

THE SCIENTIFIC AMMERICAN has now reached its Fourteenth Year, and will enter upon a New Volume on the 11th of Sectember. It is the only weekly publication of the kind now issued in the country, and it has a new Young circulation in the sectember. a very extensive circulation in all the States of the Union. It is not, as some might suppose from its title, a dry, abstruse work on technical science; on the contrary, it so deals with the great events going on in the scientific, mechani sal and industrial worlds, as to please and instruct every one. If the Mechanic or Artizan wishes to know the best machine in use, or how to make any substance employed in his business—if the Housewife wishes to get a business—if the Housewife wishes to get a recipe for making a good color, &c.—If the Inventor wishes to know what is going on in the way of improvements—if the Manufacturer wishes to keep posted with the times, and to employ the best facilities in his business—if the Man of Leisure and Study wishes to keep himself familiar with the progress made in the chemical laboratory, or in the construction of telegraphs, steamships, railroads, respers, mowers, and a thousand other machines and appliances, both of peace and war—all these deers, and a thousand other machines and appliances, both of peace and war—all these desiderata can be found in the Scientific American, not elsewhere. They are here presented in a reliable and interesting form, adapted to the comprehension of minds unlearned in the higher branches of science and art.

Certificate.

This is to certify to the Public that I have been, since I was ten years old, working and building Wool Factories, and I here say, without hesitation, that those Machines of D. O. Hawthorn's—Carding Machines, Burring Machines, Picking Machines—are the best I have ever seen, and believe they will surpass any if this State for satisfaction.
