COLUMBIA'S MODERN HOMESITE DEVELOPMENT FOR THRIFTY COLORED PEOPLE

KEY MAP SHOWING RELATIVE
LOCATION OF FAIR ACRES

Here, for the first time in the Columbia area, is a modern, well planned, attractive subdivision for ambitious colored people who want a home of their own, a built-to-last home amid pleasant surroundings. Fair Acres is close in and easy to get to, it lies between two city bus lines and two main paved highways leading to Columbia.

Lots at Fair Acres can be bought with a small down payment, and the balance on easy terms to suit the purchaser, and after a lot has been purchased responsible people will be given financial assistance to enable them to build.

Building restrictions at Fair Acres will always protect your investment, as no cheap or unsightly homes will be permitted. The standardised plan for homes calls for substantial concrete block construction, a type of home that is at once inexpensive to build and keep in repair. The two-room house as shown here can be built as a starting unit, and later added to as shown in the larger picture below. A sample house on the property is now practically completed to give you an idea of the method of construction.

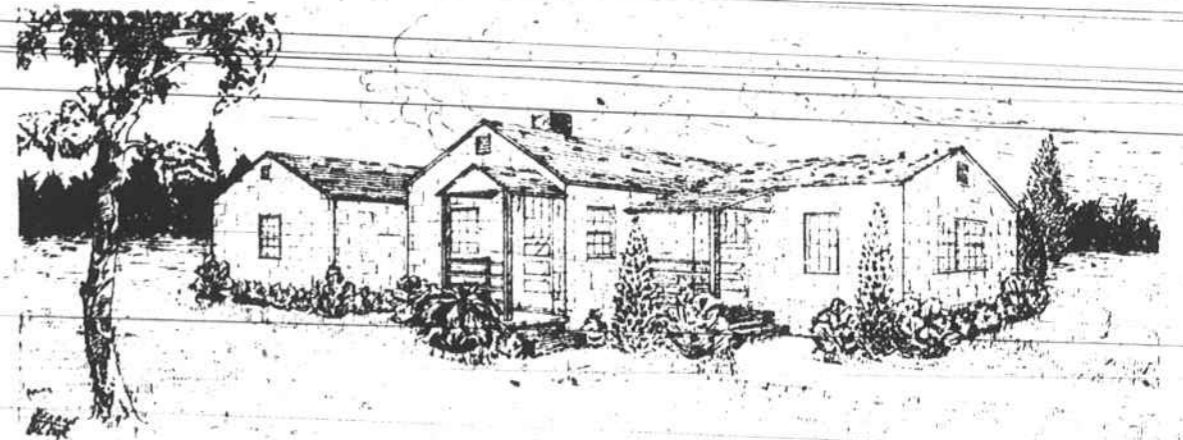

GEORGE WASHINGTON

Known throughout this section as an expert in stone work, will personally supervise the erection of buildings at Fair Acres. This is your assurance of the very best in building construction.
