President Asks Business, Labor to Help Government Keep Prices Down!

I'll Buy That.

Yes sir, Mr. President! As the Electric Servant, my average hourly residential wage has been going down steadily, right along!

Let's look at the record of my hourly wage in homes across the U. S. A.:

In 1937 (20 years ago) it averaged	4 1/3¢ a kilowatt hour
In 1947 (10 years ago) it averaged	3 1/10¢ a kilowatt hour
In 1952 (When you became president) it averaged	2 3/4¢ a kilowatt hour
In 1957 (Today) it averages ONLY	2 2/3¢ a kilowatt hour

And here in the area served by SCEGCO the average residential rate TODAY is only 2.3¢ per kilowatt hour!

Can anything else that you know of match that matchless record?
